Operation Guide * Connection method

1 LAN connection

The Console and the host are connected to the same local area network, and the Console can be connected to the network through RJ45 IN.

 Select a wired connection on the Console to search for a host that can be connected, and click to connect.

2 Wireless connection

 Connect to the hotspot of the Interactive Intelligent Panel (make sure the hotspot of the Interactive Intelligent Panel is turned on, you can check it in "Settings–Wireless Hotspot" of the Interactive Intelligent Panel)

Select wireless connection on the Console, and enter the hotspot password of the Interactive Intelligent Panel to connect successfully.

- Note: This device can support adapter and PoE power supply, and PoE power supply can only be used when DC is connected.
- Note: The host terminal needs to be adapted in advance with the Console to realize the connection.

The connection diagram is as follows:

* Instructions

1 Meetings

All meeting schedules are displayed here. You can launch a meeting with one click.

② Host device apps

Select the application on the host device to display and click to launch.

3 Screen sync

Synchronize the screen and control all operations on the host.

④ Settings

Settings of console, support changing the launcher layout, switching the pairing mode, etc.
