Dear Tim:

About this project:

1. Please check the revised external photo
2. Please check the revised internal photo
3. Sorry that we make mistake on the page 9 of the EMC report. We revised the report and on page 5, I did describe about the radiated data >1GHz.

And about the test photo, it showed 3 test modes for radiated test, because of we tested for the 3 test modes on radiated below 1GHz.

4. I changed the limits of frequency 9748MHz, because it is in the restricted area, so the limit could be emission level of 2437MHz -20.

Thank you for your kind assistance.

Best Regards,

Stephanie Hung (æ'æ|è†)
