

## Test Kit User Manual

### Use Responsibly.

Read all instructions and safety information before use.

### SAFETY INFORMATION

#### FAILURE TO FOLLOW THESE SAFETY INSTRUCTIONS COULD RESULT IN INJURY

**BATTERY SAFETY HANDLE WITH CARE.** Your device contains a rechargeable lithium-ion polymer battery and should be replaced only by a qualified service provider. Do not disassemble, open, crush, bend, deform, puncture, shred or attempt to access the battery in your device. Do not modify or remanufacture the battery, attempt to insert foreign objects into the battery, or immerse or expose it to water or other liquids, expose to fire, explosion or other hazard. Only use the battery for the system for which it is specified. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage or other hazard. Do not short-circuit a battery or allow metallic conductive objects to come into contact with battery terminals. Avoid dropping the device or battery. If the device or battery is dropped, especially on a hard surface, and the user suspects damage, do not attempt repair.

Small parts contained in the Test Kit may present a choking hazard to small children or animals. Keep small parts away from children. Your Test Kit should only be used in accordance with the instructions and intended purpose. Using this accessory in any way other than its intended purpose could cause injury to yourself, others or damage to the device. Your Test Kit is not waterproof and as such should not be submerged in water, doing so could cause injury to yourself, others or damage to the device.

### FCC Regulations

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**Caution:** Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

### FCC RF Exposure Information (SAR)

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the United States.

During SAR testing, this device is set to transmit at its highest certified power level in all tested frequency bands, and placed in positions that simulate RF exposure in usage near the body. Although the SAR is determined at the highest certified power level, the actual SAR level of the while operating can be well below the maximum value.

The exposure standard for wireless employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg.

The FCC has granted an Equipment Authorization for this model device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines.

For this device, the highest reported SAR value for usage near the body is 1.08 W/kg.

While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement.

#### **Quick Start Guide**

1. Charge your Test Kit.

Plug in the charging dock and drop in the Test Kit, with the gold circles sitting on the gold pins.

2. Open the App and select Set Up Device.

Then follow the in-app instructions.

3. Scan this code.
