Subject: Re : TCB Review Comments for (A06-1113f- OMJ0022- Datalogic handheld PC)

Dear Steve

TCB Review Comments for (A06-1113f- OMJ0022- Datalogic handheld PC)

-EMC-

Question #1: P43 of user's manual, please explain if this product contains GSM function?
(Embedded image moved to file: pic02421.gif)

ANS: Our client reply as below:

MEMOR firmware is written by our customer. And this UI in below figure is the general UI layout for all of their products. MEMOR doesn't support GSM/GPRS function. In right side of GSM/GPRS area, it always shows "NO CARD" to point out there isn't any GSM/GPRS hardware inside MEMOR. The other two blocks, Bluetooth & Wi-Fi shows which function enabled. For example, the below figure shows Wi-Fi is enabled and Bluetooth is off.

Question #2: Per FCC label policy, only cell phone or cordless phone can have label applied inside the battery compartment, all other device need to have a special approval by FCC. Please submit an application letter with reason of why label can not be applied on the surface and we will submit it to the FCC for their approval if desired.

ANS: Please find attached the application letter with reason of why lable can be applied on the surface.
(See attached file: Letter for Label Location_OMJ0022.pdf)

Thanks for your assistance!

Best Regards
Wendy Liao
