PY7-47198F Data Reuse justification and summary

To Whom It May Concern:

We are applying data reuse for FCC ID PY7-47198F (variant) based on parent model FCC ID PY7-15465A. Both devices share the same PCB layout, antennas, and most of the components with the following features.

- WLAN 2.4GHz/5GHz
- Bluetooth

WLAN 2.4GHz/5GHz and Bluetooth data for the parent model remains representative for the variant model (equipment classes DSS, DTS and NII) and test reports for the parent model plus test reports with the spot check data for the variant model have been submitted. The power to be listed on the F-731 and FCC grants for these bands are the values detailed in the parent report as the spot check data shows all values within expected tolerances of the parent model.

FCC ID	802.11 DTS	Bluetooth DTS	Bluetooth DSS	802.11 NII
PY7-15465A Parent	FR1O1906C	FR1O1906B	FR1O1906A	FR1O1906E FR1O1906F
PY7-47198F Variant	FR1O1907C	FR1O1907D	FR1O1907A	FR1O1907E FR1O1907F
	Indicates full set of test data. Values in this report to be listed on the grant for these bands.			
	Partial test data used to confirm that parent model data is representative for the variant model. Data for these bands is for reference only			

We confirm that the test data reuse policy of FCC KDB 484596 D01 Referencing Test Data v01 has been followed and take full responsibility that the test data as referenced from the parent model report represents compliance for the new FCC ID.

Yours sincerely,
