Date: June 21, 2023

FCC Laboratory
7435 Oakland Mills Rd
Columbia MD 21046

SUBJECT: Class II Permissive Change for FCC ID: E2KFM350GL

The intention of this application is to enable the modular FCC ID: E2KFM350GL, granted on **06/12/2023** to be integrated in **DELL Portable Computer P179G**. Comparing to the previous granted filing on 03/11/2023 for the dedicated host, this filing enables the Sub-6 n48 operation is via embedded software.

The module enabled 5G NR band n48 by software and installed into host platform mentioned above is electronically and mechanically identical to the original certified module. The Original FCC testing on module under FCC ID: E2KFM350GL was performed with an antenna of higher gain, and the antenna was connected to the module in an open environment. The current host platform under application uses an antenna of the same type but of lower gain and is installed inside the host platform enclosure. The physical restraints introduced by the host platform should have resulted in equal or lower level of radiated emission. Therefore, additional Radiated emission testing is not necessary.

Sincerely yours,

A handwritten signature in black ink that reads "Greg Hsiao". The signature is written in a cursive, flowing style.
