FLIhub + FLIcube

All-in-one fast charging solution

User manual

Welcome

Thank you for purchasing the FLIhub + FLIcube all-in-one fast charging solution which allows you to charge your battery powered devices at the same time. The FLIhub provides 10 watts of Qi wireless power and 50 watts of conductive power. Simply place the FLIcube on the FLIhub conductive surface to fast charge up to 2 devices at once via dual 12 watt USB-A ports.

Package contents

- (1) FLIhub charge pad
- (1) FLIcube charging module
- Power cord
- User manual

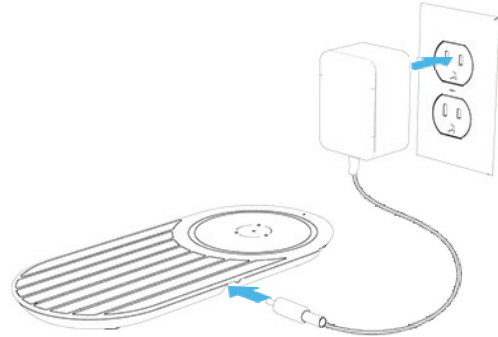

Features

- FLIhub + FLIcube can charge up to 3 of your mobile devices at the same time including smartphones, tablets, smart watches and other mobile devices.
- FLIhub features a 50 watt conductive charging surface that delivers high power wirelessly to the FLIcube charging module and other FLI Charge modules.
- FLIhub also features a 10 watt Qi wireless charge pad to fast charge the latest Apple, Samsung and Android phones plus other Qi-enabled devices.
- The FLIcube charging module delivers a combined 24 watts of fast charging power via dual 12 watt USB-A ports.

2

How to Use

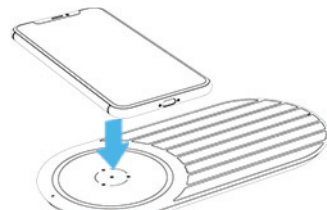

- Use the supplied power plug to connect the FLIhub to the wall outlet.

3

How to Use

- Place your Qi-enabled wireless device on the Qi pad.

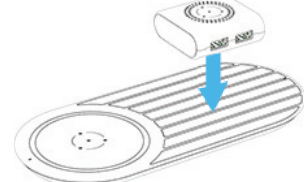

- Charging begins on contact.

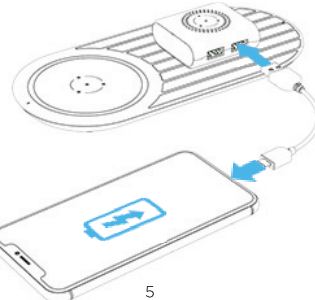

4

How to Use

- Place the FLIcube charging module onto any powered FLI Charge conductive surface ensuring that at least 2 of the pogo pins located on the bottom make contact.

- Plug in a USB-A charging cable and connect to fast charge your mobile devices

5

Maintenance and Usage

- The AC wall outlet should be located near the FLIhub charging pad and be easily accessible.
- The FLIcube can charge up to two mobile devices (smartphones, wireless earbuds, tablets, cameras, etc.). However, certain devices or combination of devices may require more power than is available. When this happens, the indicator light on the FLIhub will blink. Remove the high powered device to resume normal charging.
- Ensure that dirt or other contaminants are not on the FLIhub charging pad or underneath the FLIcube. Charging will not occur if proper contact between the FLIhub and FLIcube is not made.
- Ensure that the Qi-enabled device is resting flat on the Qi portion of the FLIhub. Charging will not occur if the device is in a tipped position and not centered on the pad.
- If you are using a case with your Qi-enabled smartphone, ensure that it is not too thick and is Qi compatible. Otherwise, your phone may not charge.

Troubleshooting Guide

The following table lists potential problems and their suggested solutions:

Problem	Cause	Solution
Indicator light does not turn on when a device is placed on the FLIhub charging pad.	The device is not Qi-enabled.	Place only Qi-enabled devices on the Qi charging pad.
	Device is not resting properly on the FLIhub charging pad surface.	Ensure the device is laying flat and making good contact with the charging surface. Clean pad surface if necessary.
	DC power plug not firmly plugged into charging pad or AC adapter not plugged into wall socket.	Ensure the AC adapter is plugged into a working outlet and DC power plug is firmly inserted into charging pad.
	Metallic objects such as keys or coins may be on the charging pad.	Remove metal objects and charging will resume normally.
Device does not indicate charging when placed on the FLIhub charging pad.	Smartphone case is too thick and/or non Qi-compatible.	Replace with thinner and/or Qi-compatible smartphone case.
	Device is not resting properly on the FLIhub charging pad surface.	Ensure the device is laying flat and making good contact with the charging surface. Clean pad surface if necessary.
Indicator light continuously blinks on and off (devices do not charge).	Smartphone case is too thick and/or non Qi-compatible.	Replace with thinner and/or Qi-compatible smartphone case.
	Overload condition; Try removing devices.	Remove devices one at a time until blinking stops.
