Dear Ms. Helen Zhao,

Thank you for your quick corporations for this project.

We send the reply for your questions.

- 1. We performed all modes of operation, but worst case is 1024 x 768 @75Hz.
- 2. We performed the test up to 2GHz, but couldn't find the noise above 1GHz. So, we insert the note in the test report.

("3. We performed the test up to 2GHz, but not found noise above 1GHz")

If you have any comment for above, please don't hesitate contact me.

Thanks & Best regards

Sang Jun Lee ---- Assistant Manager HYUNDAI Calibration & Certification Tech. Co., Ltd.
