The image shows a custom printed circuit board (PCB) populated with an Arduino Uno microcontroller. The board is green and populated with various components including resistors, capacitors, and a USB Type-C connector. The microcontroller is a black integrated circuit with gold pins. The board is populated with numerous surface-mount components, including resistors (labeled R1 through R32) and capacitors (labeled C1 through C30). A USB Type-C connector is visible on the left side of the board. The board is populated with various components including resistors, capacitors, and a USB Type-C connector.
