Subject: Class II Permissive Change (C2PC) Request

Dear OET / TCB,

RF exposure for this device is addressed in the original application using the exclusion thresholds in KDB 447498 D04. This C2PC does not affect that original assessment for rf exposure as it does not introduce any new operating bands or operations at higher output powers than those covered in the original assessment.

Regards,

Mark Briggs
Director, Wireless Certification Services
