FCC ID: TUVET-8452

RF Exposure

Applicable Standard

According to §1.1307(b)(5), systems operating under the provisions of this section shall be operated in a manner that ensure that the public is not exposed to radio frequency energy level in excess of the Commission's guideline. This is a Portable device. The Section 4.3.1 and Appendix A of KDB447498 D01 V05 was used as the guidance.

Calculation Result (Worse case)

[(max. power of channel, including tune-up tolerance, mW)/(min. test separation distance, mm)] \cdot [$\sqrt{f(GHz)}$] =0.31/5 * 1.55= 0.096, this value is less than 3.0 for 1-g SAR and \leq 7.5 for 10-g extremity SAR.

The SAR measurement is not necessary.
