

RE: Taser International
FCC ID: X4GS00832
IC: 8803A-S00832
ATCB017799

After a review of the submitted information, I have a few comments on the above referenced Application. Depending on your responses, kindly understand there may be additional comments.

1) Regarding the request on the labeling of the 2 part statement for previous comment 3 – kindly note that TCB's can not "interpret" the rules. If a request to get permission as cited in the letter is necessary – then the FCC will need to be consulted directly. If FCC permissions is requested, kindly let us know if the applicant, LS Research, or ACB should consult with the FCC regarding an attempt to get permission. Note that optionally, it may be possible for the applicant to justify "impractical" under KDB 784748 section 2.2. However if this is done and the FCC later questions this justification, the burden of proof will have to be presented from the applicant. Kindly let us know how you wish to proceed.

Response – The label area is considered too small for the 15.19(a) statements to be read legibly and would be impracticable for the manufacture to produce. The statements can be found in the user manual supplied with the device.
