application for equipment certification, FCC-ID: POOWML-C07

Dear Application Examiner,

we hereby submit the application for certification for the WML-C05 Bluetooth module on behalf of Mitsumi Electronics Co. Ltd. This application is a **modular** approval application for a device operating in the frequency range of 2.4 to 2.4835 GHz. The maximum measured peak power output is 6,42 dBm (7,11 mW).

Another variant of this module was filed under the FCC-ID: POOWML-C06. The only essential change is the output power which was increased. Because of hardware changes, all necessary tests were repeated.

The document 'Exhibits' gives an overview about the submitted documents

Best Regards

Torsten Lohoff
