The speaker voltage is 5V/1A (5.0V/1.0A).

In order to charge the product in safe manner and reliable condition, please only select official appropriate charger adapter for charging the product.
Only charge the product at ambient temperature between 0°C (32°F) and 40°C (104°F).

Do not touch the product while it is charging. Do not use the product while it is charging.

Please note that we can't take any responsibility for any wrong operation (eg. voltage higher than 5V) as this may result in device injury or loss of property, and we cannot control the operating pressure during the time the user using the product.
In extreme cases, there is a risk of fire or battery pack can lead to explosion. Just guarantee the development of product development.

FCC ID: 24DMS-SP-0108

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device must not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

2. Changes to specifications not approved, approved by the party responsible for development could void the user's authority to operate this equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates noise and can receive radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that such equipment will not cause such interference. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF exposure statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
