RE: FCC ID: APV-4530LAW, Declaration for reuse of reports

To Whom It May Concern,

We, CalAmp Corp., are filing for our own FCC ID (APV-4530LAW), utilizing a Gemalto ELS61-US module (FCC ID: QIPELS61-US) and a ublox module (FCC ID: PVH0965).

We are using original test reports and declare these test reports accurately represent CalAmp's conditions of use, ensuring the antenna is of the right type and gain. No alterations of the module(s) were made. They are identical to the original configuration.

As required, SAR and radiated emissions were evaluated in the host configuration with passing results.

Please contact me if there is any information you may need.

Sincerely,

Sr. Manager, Certification
