

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of the EUT housing. The housing is a light-colored plastic shell, and the internal board is a green PCB with various electronic components, including a camera lens and a battery. A black ruler is placed next to the housing for scale, showing measurements in millimeters and centimeters.
Solder Board-Component View 1	 A close-up photograph of the solder board component. The board is a small, square PCB with a camera lens and various electronic components. A black ruler is placed next to the board for scale, showing measurements in millimeters and centimeters.

Solder Board-Component View 2	 A photograph of a small, square electronic component board, likely a module, placed on a blue textured surface. The board is surrounded by a black L-shaped ruler with white markings in millimeters. The ruler shows dimensions of approximately 100mm by 100mm. The component board is positioned in the upper right quadrant of the ruler's frame.
Solder Board-Component View 3	 A photograph of the same small, square electronic component board, viewed from a different angle. It is placed on the same blue textured surface and surrounded by the same black L-shaped ruler. The ruler markings are visible, showing dimensions of approximately 100mm by 100mm. The component board is positioned in the upper right quadrant of the ruler's frame.

Solder Board-Component View 4	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: a vertical scale on the left ranging from 0 to 90 mm and a horizontal scale at the bottom ranging from 0 to 100 mm. The component is located approximately at the 10 mm mark on the vertical scale and the 20 mm mark on the horizontal scale.
Solder Board-Component View 5	 A photograph showing a small green printed circuit board (PCB) component mounted on a blue textured surface. The component is positioned next to a black ruler with white markings. The ruler has two scales: a vertical scale on the left ranging from 0 to 90 mm and a horizontal scale at the bottom ranging from 0 to 100 mm. The component is located approximately at the 10 mm mark on the vertical scale and the 20 mm mark on the horizontal scale.
