

INTERTEK TESTING SERVICES

Purpose of Application

The purpose of this application is to report changes in the previous certified product for production reason. The main modification is adding TAD PCB and answering machine function on the base unit. The software of the handset is the only change for remote answering machine function, and this does not affect the EMC power or field strength. The RF module of base unit is remained the same, and all other designs including electronic and electrical are identical.

As the RF module and the FHSS mechanism of the base unit remained unchanged and they have the same handset, only the out of band emissions results of base unit was included.
