FCC Laboratory  
7435 Oakland Mills Rd.  
Columbia, MD 21046

SUBJECT: Justification Letter

The product in this submission, the WWAN module and Antennas in FUJITSU Tablet Notebook / Model: T726 are electronically and mechanically identical to FUJITSU Tablet Notebook / Model: T725 that has been granted by FCC dated 4<sup>th</sup> December 2014.

The physical restraints introduced by this new host platform should have resulted in equal or lower level of SAR results. Therefore, the original WWAN SAR measurement report "M141025\_FCC\_EM7355\_SAR\_GSM-UMTS Report" has been referenced.

Only the WLAN module Intel 7265 is being replaced by Intel 8260, hence the multiband evaluation test results are submitted in report "M150813\_FCC\_EM7355\_WWAN Report".
