Hi MIke,

It's very thankful for your reviewing our application.
We did test the output power was tuned to max. output power during the final compliance test.
We asked the manufacturer this question about the user manual.
They told us the user manual need to be modified as below

Supports 20dBm (Class 1) Output Power operating distance up to 100 meters.
change to ----> Supports 0dbm (Class 2) Typical output power.

If you have any instruction, please advise us.
Thank you very much.
Best regards,
Will Yauo / ETC
