### QUICK TIPS

- When connecting through Bluetooth on Mac/PC/Android, GO Keyboard should be in Bluetooth 1 or Bluetooth 2 setting. Press hold CONNECT button until the light starts blinking. Enter your Bluetooth device settings to connect.
- If your device is not connecting, Forget the "JLab GO Keys" in your device settings. Turn off and on the GO Keyboard. Press hold the CONNECT button until blinking light to enter pairing mode. Reenter your device settings to repair.
- If the 2.4G USB dongle is not registering the connection, unplug the dongle and turn off the GO Keyboard. Turn on the GO Keyboard and Quick Press the CONNECT button. LED will flash purple. Plug the dongle back in until LED shows solid blue light.
- Keys are non removeable. Do not try to remove in any circumstance.
- To clean the keyboard, do not use spray cleaner directly on the keyboard. Lightly spray a cloth or microfiber fabric and then wipe the keyboard.
- To completely disconnect all wireless devices and return to factory settings, press hold "T"+"H"+"J" for 3+ seconds.

**FCC Caution:**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
