

The image displays a collection of technical manuals and user guides arranged in a grid-like fashion. Each manual features a distinct header with a language code or brand identifier, followed by a title and a QR code. The visible titles include:

- FR**: Emergency function (Funzione d'emergenza), Manual d'emploi rapide (Manuale di emergenza), Common fault diagnosis (Diagnostica dei guasti comuni), Common fault solution (Soluzione dei guasti comuni), Operating instructions (Istruzioni per l'uso), and Attention.
- IT**: Guida di avvio veloce per (Quick start guide for), Funzioni fondamentali (Basic functions), and Sicurezza (Safety).
- Other languages/brands**: English versions of some manuals are also visible, such as "Emergency function" and "Common fault diagnosis".

The manuals are presented in both printed and digital formats, with some showing QR codes linking to additional resources. The overall theme is technical documentation for industrial or commercial equipment.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- ▶ -Reorient or relocate the receiving antenna.
- ▶ -Increase the separation between the equipment and receiver.
- ▶ -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- ▶ -Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
