December 24, 2003

RE: GEMTEK TECHNOLOGY CO., LTD.

FCC ID: MXF-M921015AG

I have a few comments on the above referenced Application.

Basic Information

- 1) The test report mentions 8 antennas, however only 6 different antennas appear to be shown in the external photographs. Please provide external photographs of all 8 antennas.
- 2) This device is actually a module. Given the device, the application should be accompanied by a modular request letter for mobile applications only. Please provide.
- 3) None of the bandedge plots on Pages 247-250 match the data given on pages 242-246 for the Normal Mode. Compliance for Normal mode can not be adequately determined. Please review and correct.

Timothy R. Johnson
Examining Engineer
