Test Report, Part 15

Rev: 040103

Issue Date: May 25, 2004

Report Number: 04-0020

Customer: Radio Systems Corporation

Model: TC-101

## **OPERATIONAL DESCRIPTION**

TC-101 is a Pet Training and Containment System. The system transmits an 8 second maximum magnetic field at 10.65 kHz. The signal is received by a pet wearing a receiver collar. The collar receives signals at 303.825 Mhz. When the signal is received, the collar generates an discouragement pulse to the pet.
