Quick Start Guide

Screws and Anchor Kit

Digital Adapter and Sticker
(For use when replacing a digital chime doorbell)

16GB MicroSD Card (Pre-installed)
What You Will Need: Philips Screwdriver, access to circuit breaker, 2.4GHz Wi-Fi network, network name and password.

Hmmm...which kind of doorbell do I have?
Identify which kind of doorbell you have?

Standard Mechanical Doorbell

Mechanical (Ding Dong Sound)

Digital* (musical chime)
Digital Doorbell

The **Digital Adapter** is required for use with a Digital Doorbell. Use with a mechanical chime if the mechanical chime develops a "hum". The sticker can be used to attach adapter to the chime.
Existing Doorbell

Front   Trans   Rear

Digital Adapter

Transformer (load box)

NOTE: If you have a digital Doorbell and it has a diode installed on on the actual doorbell button, do not use the diode when replacing the doorbell with your new Video Doorbell.

1 Turn off power to your doorbell at your circuit box.

SUPER IMPORTANT!

ON
OFF

2 Grab a screwdriver and remove your existing doorbell button.

(not included)

SIMPLE WIRELESS SOLUTIONS
Model AMZ30DB

3 Thread the doorbell wires through the center of the square opening in the mounting bracket with tabs.
4 For installation on stone, brick or stucco, use the mounting bracket template to mark where holes need to go. Then drill 3/16" holes and insert anchors, give them a tap with a hammer or mallet.

Bracket Template
5 Mount the bracket to the wall next to your door using the screws and anchor kit included.
SIDE WALL MOUNTING
If doorbell is on side wall, stack the two brackets included with the tabbed bracket on top to create a 30° angle

TABS intentionally removed
Brackets 1 with tabs, 1 without tabs

6 Attach both wires from the original doorbell button to the terminals on the back of the Video Doorbell.

There – you did it!

NOTE: It does not matter which wire connects to which terminal of the Video doorbell.
7 Line up the video doorbell on the bracket and slide up or down until secure. It will click into place

It should be look'in good.
8 POWER ON! Flip that circuit breaker, run back to the doorbell and wait until the LED ring repeatedly flashes 3 times. It may take up to 1.5 minutes for the unit to activate. **Ring-a-ling?**

Did you hear it ring when tested?

ON
OFF
9 **Device Setup** Download the **Cam Sees** App and open it. Use the Set Up Wizard to connect to your Wi-Fi network and follow the steps to finish installation.

Sweet! You're almost there.

FCC Warning

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any inte rference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interferenceto radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
