Manufacturer declarations

**FCC 15.323 (c) (5):**

This device or group of co-operating devices located within 1 meter of each other shall not during any frame period occupy more than 6 MHz of aggregate bandwidth, or alternatively more than one third of the time and spectrum windows defined by the system.

Manufacturer agrees: ☒ Yes ☐ No

**FCC 15.323 (c) (12):**

This device shall not use the provisions of (c) (10) or (c) (11) to extend the range of spectrum occupied over space or time for the purpose of denying fair access to spectrum to other devices.

Manufacturer agrees: ☒ Yes ☐ No

**FCC 15.307 (b):**

The applicant is a participating member of UTAM, Inc. and will provide a related affidavit from UTAM, Inc. in course of certification.

Confirmation by applicant: ☒ Yes ☐ No

**FCC 15.319 (f) Automatic discontinuation of transmission:**

This device shall automatically discontinue transmission in case of either absence of information to transmit or operational failure. Automatic break off the transmissions means break off of connection and break of transmissions which are not control and signalling information or repetitive codes of complete frame or burst intervals. In case of devices using basics of DECT technology at least fixed parts and repeaters are using control and signalling information without direct connection to their remote station.

*Please fill in the table below with the reaction of the EUT (FP and/or PP) using A, B or C.*

	Situation	Reaction of EUT		Verdict
		FP		
1	Switch-off counter part	B		
2	Hook-on by counter part	B		
3	Switch-off by EUT	A		
4	Hook-on at EUT side	Not possible		
5	Remove power from EUT	A		
6	Remove power from counterpart	B		

A – Connection break down, cease of transmit

B – Connection break down, EUT transmits signalling information

C – Connection break down, counter part transmits signalling information
