## Regulatory Compliance Statements

### FCC Warning Statements

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference with radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

1. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
2. This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. To maintain compliance with FCC RF exposure requirements, avoid direct contact to the transmitting antenna during transmitting.
3. Any changes or modifications (including the antennas) made to this device that are not expressly approved by the manufacturer may void the user's authority to operate the equipment.

Operation on the 5.15 - 5.25GHz frequency band is restricted to indoor use only. The FCC requires indoor use for the 5.15-5.25GHz band to reduce the potential for harmful interference to co-channel Mobile Satellite Systems. Therefore, it will only transmit on the 5.25-5.35 GHz, 5.47-5.725 GHz and 5.725–5.850 GHz band when associated with an access point (AP).

## **FCC Label Statement**

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

## **RF Radiation Exposure Statement**

For body contact during operation, this device has been tested and meets FCC RF exposure guidelines when used with an accessory that contains no metal and that positions the handset a minimum of 1.5 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines.

# Battery Notice

---

1. To guarantee optimal performance, it is recommended that rechargeable batteries be replaced every year, or after 500 charging cycles are completed. It is normal for the battery to balloon or expand after one year or 500 cycles. Although it does not cause damage, it cannot be used again and must be disposed of according to the location's safe battery disposal procedures.
2. If a battery performance decreases more than 20%, the battery is at the end of its life cycle. Stop use and ensure the battery is disposed of properly.
3. The length of time that a battery lasts depends on the battery type and how the device is used. Conserve the battery life by doing the following:
  - Avoid fully uncharging the battery because this places additional strain on it. Several partial uncharges with frequent charges are better than a fully uncharged battery. Charging a partially charged battery does not cause harm to the unit.
  - Keep the battery cool. Avoid hot vehicles. For prolonged storage, keep the battery at a 40% charge level.
  - Do not leave the battery uncharged and unused for an extended period of time, the battery will wear out and the longevity of the battery will be at least half of one with frequent charges.
4. Protect battery life by not over or under charging the battery.
5. Please do not leave battery unused for long time without charging it. Despite unitech's safety precautions, the battery pack may begin to change shape. If so, stop using it immediately. Please check to see if you are using a proper power adapter to charge the battery or contact your service provider for service.
6. If you cannot charge the battery after it has been idle for an extended period of time and it begins to heat up, please do not try to charge it. It may not be functional anymore.
7. Please only use the original battery from unitech. Using a third party battery can damage our products. Please note that when such damage occurs, it is not covered by unitech's warranty policy

**CAUTION!**

- RISK OF EXPLOSION IF BATTERY IS  
REPLACED INCORRECTLY.  
DISPOSE OF USED BATTERIES ACCORDING  
TO THE INSTRUCTIONS..
- 如果更換不正確之電池行事會有爆炸的風險  
請依製造商說明書處理用過之電池
- 如果更换不正确之电池行事会有爆炸的风险  
请依制造商说明书处理用过之电池

## Battery charge notice

It is important to consider temperature when the battery pack is charging. Charging is most efficient at normal room temperature or in a slightly cooler environment. It is essential that batteries are charged within the stated range of 0°C to 40°C. Charging batteries outside of the specified range could damage the batteries and shorten their life cycle.

**CAUTION!** Do not charge batteries at a temperature lower than 0°C. This will make the batteries unstable and dangerous. Please use a battery temperature detecting device for a charger to ensure a safe charging temperature range.

## Storage and safety notice

Although charged batteries may be left unused for several months, their capacity may be depleted due to build up of internal resistance. If this happens, they will require recharging prior to use. Batteries may be stored at temperatures between -20°C to 60°C, however they may deplete more rapidly at higher temperatures. It is recommended to store batteries at room temperature.

\* The message above only applies to the usage of the removable batteries.  
For the products with non-removable batteries / without batteries, please refer to the specification of each product.

## Product Operation and Storage Notice

The unitech product has applicable operation and storage temperature conditions. Please follow the limitation of suggested temperature conditions to avoid failure, damage or malfunction.

\* For applicable temperature conditions, please refer to the specification of each product.

## Adapter Notice

---

1. Please do not leave the power adapter in the socket when it is not connected to your unitech product for charging.
2. Please remove the power adapter when the battery is fully recharged.
3. The bundled power adapter that comes with your unitech product is not meant to be used outdoors. An adapter exposed to water or rain, or a very humid environment can cause damage to both the adapter and the product.
4. Please only use the bundled power adapter or same specification of adapter to charge your unitech product. Using the wrong power adapter can damage your unitech product.

\* The message above only applies to the product connected to the adapter.  
For the products without using the adapters, please refer to the specification of each product.

### BT mode – HID

1. 按住trigger鍵維持1秒以啟動裝置。
2. 掃描 **[DISCONNECT]**
3. 掃描 **[BT mode-HID]**; 掃描器會發出幾聲嗶聲。
4. 請在您的主控裝置上搜尋MS912+。從探索到的裝置清單中選擇「Wireless Scanner」，(PC裝置，請選擇“Create a pairing code for me”)
5. 藍牙應用程式將提示您輸入一組隨機Pin碼。
6. 請參考下一页的 **PINCODE SETUP**
7. 掃描器將發出2次嗶聲，證實已連線成功。

### BT mode - SPP

1. 按住trigger鍵維持1秒以啟動裝置。
2. 掃描 **[DISCONNECT]**
3. 掃描 **[BT mode -SPP]**; 掃描器會發出幾聲嗶聲。
4. 請在您的主控裝置上搜尋MS912+。從探索到的裝置清單中選擇「Wireless Scanner」(PC裝置，請選擇“Enter the device's pairing code”)
5. 輸入Pin碼 ( 預設為「1234」)。
6. 開啟 COM 連接埠(已正確設定)的序列通訊軟體。
7. 掃描器將發出2次嗶聲，證實已連線成功。

### BT mode - HID non-pincode

1. 按住trigger鍵維持1秒以啟動裝置。
2. 掃描 **[DISCONNECT]**
3. 掃描 **[BT mode - HID non-pincode ]**; 掃描器會發出幾聲嗶聲。
4. 請在您的主控裝置上搜尋MS912+。從探索到的裝置清單中選擇「Wireless Scanner」，(PC裝置，請選擇“Pair without using a code.)
5. 掃描器將發出2次嗶聲，證實已連線。

注意：在此模式下，主控裝置會將掃描器識別為滑鼠(指標裝置)。如果您的主控裝置找不到掃描器，請嘗試**[BT mode -HID]**。

#### 4.2.2.1 Pincode 設定

<b>STEP 1</b> Pincode Start	
<b>STEP 2</b> 數字表（請參閱附錄A）	
<b>STEP 3</b> Enter	
<b>STEP 4</b> Pincode Stop	

## 4.2.2.2 連線至 iOS & Android

### 連線至 - iOS (Apple)

請參照 [BT mode - HID]. 因 Apple 裝置不需要 pincode 來連線，所以請忽略步驟 5&6.

#### 觸控式鍵盤

若要切換 iPhone/iPad 觸控式鍵盤，請掃描下方的條碼，或只要按兩下掃描鍵。

ENABLE iOS HOTKEY	DISABLE iOS HOTKEY
	

### 4.2.2.3 設定藍牙裝置ID

若要為無線掃描器自訂您的藍牙裝置(MS912+)名稱，請依照下列步驟執行

步驟 1 掃描 <b>Default Wireless ID</b> 條碼	
步驟 2 掃描 <b>Set Wireless ID</b> 條碼	
步驟 3 掃描附錄 <b>B Full ASCII Chart</b> 中的英數字元。	
步驟 4 掃描 <b>設定無線 ID</b> 條碼	
步驟 5 掃描所需的BT模式條碼(SPP或HID)以執行連線。	
<p>*注意：</p> <ol style="list-style-type: none"><li>如果您在自訂您的藍牙裝置名稱「之前」，就已經透過主控裝置連線掃描器，請移除該裝置並建立一個新的連線，以確定裝置名稱已重新整理。若主控裝置為電腦，建議您重新啟動藍牙介面卡，以重新整理裝置名稱。</li><li>在步驟 3 中，如果輸入超過 7 個字元，掃描器將發出 3 次嗶聲做為警示。</li></ol>	

#### 4.2.2.4 Set Pincode

By default, the pincode under SPP profile for eh scanner is “1234” You may customize this pincode with bellows steps:

<b>STEP 1</b> Set SPP Pincode	
<b>STEP 2</b> Scan numeric barcodes (see <a href="#">Appendix A</a> ) Up to 8 numbers can be set as SPP pincode	
<b>STEP 3</b> Set SPP Pincode	
<b>STEP 4</b> Scan a desired BT mode in <b>BLUETOOTH PROFILE</b> ( <a href="#">4.2.2</a> ) to Complete the configuration.	

#### 4.2.2.5 SPP Master Mode

First, please generate one configuration barcode for the target SPP slave device in below methods:

1. The barcode must be Code 39 with no checksum
2. Barcode data format: LTB + Target MAC address

For example, the target SPP slave device's MAC address is 001583522C3B.

#### Please encode:

\*LTB001583522C3B\* in Code39 barcode.

Then, follow below steps to create connection:

<b>STEP 1</b> SPP-Master	
<b>STEP 2</b>	

## 4.2.2.6 Remote Control

### SPP REMOTE CONTROL

There are two ways to verify connection status by the host under SPP Profile.

#### Command Response

Host sends: CR,LF,{,A,L,},CR,LF (8 bytes)  
Scanner replies: O,K,CR,LF (4 bytes)

#### Beeper Response

Host sends: CR,LF,{,M,1,},CR,LF (8 bytes)  
Scanner replies: a short beep

#### SHUT DOWN

This configuration barcode will shut down the scanner immediately but still reserve the pairing record.

SHUT DOWN	
-----------	---

#### DISCONNECTION

DISCONNECT (CLEAR PAIRING RECORD)	
DISCONNECT (KEEP PAIRING RECORD)	

## 4.3 Output data transmit

### 4.3.1 Auto mode

#### Auto mode

ENABLE	DISABLE
	

When out of range, the scanner will temporarily keep scanned data in its memory buffer (2K RAM) until the buffer is full. When back in range, the scanner will send all stored data back to the host.

**NOTE:** Auto mode will not function when Batch Mode is enabled, or no connection is made beforehand.

#### BINARY CHECK CHARACTER

ENABLE	DISABLE
	

Once enabled, a checksum will be added to the end of each data to conduct Xor calculation. For Bluetooth SPP & USB-VCP, the BCC is 1 byte. For Bluetooth HID, the BCC are 2 bytes.

Example:

The barcode data is "TEST" with terminator <CR><LF>

1. Bluetooth SPP & USB-VCP:

Data Format = <T> + <E> + <S> + <T> + <CR> + <LF> + <BCC>. BCC = 54h ^ 45h ^ 53h ^ 54h ^ 0Dh ^ 0Ah = 11h

2. Bluetooth HID:

Data Format = <T> + <E> + <S> + <T> + <Enter> + <BCC> BCC = 54h ^ 45h ^ 53h ^ 54h ^ E7h = F1h

However, since control character cannot be displayed in Bluetooth HID, BCC will be converted into 2 bytes of characters.

As a result, the data will be: TEST + <Enter> + F + 1

### 4.3.2 Batch mode

Batch mode	
------------	--

After scanning the above barcode, the scanner will be able to collect barcode data off-line. The barcode data will be stored in the format of:

< Date >, < Time >, < Barcode Data > < CR >

To retrieve stored data, please connect the scanner to the host with cable, access removable storage device “MiniScan” from which you may open or copy the file “BARCODE.txt” to your computer.

To delete ONE stored data, please scan below barcode :

DELETE LAST DATA	
------------------	--

To delete ALL stored data, simply delete the file “BARCODE.txt” in the removable storage device “MiniScan” until you hear two beeps.
