# **Quick Operation Guide**

# Step 3 Configure the network of the camera

of the screen (Figure 2). Bluetooth network configuration

2. Open the iCSee app, register an account and login(Figure 1)

configuration, please configure it as follows.

Step 1 Download and install the App

Note: If the device supports Bluetooth network

1. Connect your phone to WiFi network and turn on Bluetooth.

Tips two: Search "iCSee" in the App store and download.

### Step 2 Turn on the power

Tips one: Scan the QR code below to download the "iCSee" App.

Power on the camera, turn on the device, it will send "system Usersame starting up, wait be configered. Wait for the connection, please configure the network according to the Instructions" prompt after several seconds, If the camera does not have a prompt sound for a long time, you can press and hold the camera Reset button until you hear the prompt "Restore factory settings, please do not powe off "and release it to restore the camera to factory settings and then configure the network.

If you need local storage, please install the memory card firstly, and then power on the device (the memory card does not support hot swapping, please plug and unplug the memory card when the device is powered off). Cloud storage is recommended, which is safe and convenient. Details See "Step 4" for operation.

3. After successful login, Click the "+" button in the top right corner

(Figure 3).

Figure 2

5.Enter the wireless router password and click "Confirm" (Figure 4).

4. Wait for the device to be added to be found, and click "OK"

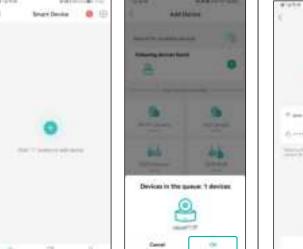

Figure 3

6. Wait for the camera network configuration, when the camera emits the voice message "connecting, please wait, connect router successfully", the network configuration is successful

8. Follow the APP interface to guide you through the setup. After ease configure it as follows the configuration is completed, the device is displayed in the
