

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the white plastic housing of the EUT (Electronic Under Test) and its internal components. The housing is open, revealing a green printed circuit board (PCB) with various electronic components. A black ruler is placed vertically next to the housing for scale, with markings in millimeters and centimeters. The background is a blue textured surface.
EUT Housing and Board View 2	 A photograph showing the white plastic housing of the EUT and its internal components from a different angle. The housing is open, revealing the green PCB and the internal components. A black ruler is placed vertically next to the housing for scale, with markings in millimeters and centimeters. The background is a blue textured surface.

Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 1'. The component is rectangular and features various electronic components, including a central integrated circuit (IC) with a large number of pins, several smaller ICs, and various passive components like resistors and capacitors. The component is placed on a blue textured surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters (mm) and centimeters (cm). The ruler markings are visible from 0 to 100 mm.
Solder Board-Component View 2	 A photograph of a green printed circuit board (PCB) component, labeled 'Solder Board-Component View 2'. The component is rectangular and features various electronic components, including a central integrated circuit (IC) with a large number of pins, several smaller ICs, and various passive components like resistors and capacitors. The component is placed on a blue textured surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters (mm) and centimeters (cm). The ruler markings are visible from 0 to 100 mm.
