General Product Information

Product Function and Intended Use

The Algiz RT7 is a rugged tablet, designed for use by field personnel in demanding conditions. It integrates best-in-class connectivity with efficient computing and multimedia features. The tablet runs Android Lollipop (5.1.1) operating system, and comes pre-installed with many Google applications, including Google Play.

Ratings and System Details

Modulation	GSM -> GMSK ; GPRS -> GMSK & EDGE -> 8PSK
Channel Spacing	200kHz
Number of Antenna	One
Antenna Gain and Antenna type	0dBi & Integrated Antenna
Supply Voltage to Product	Internal Battery Pack -> 3.7- 4.2 VDC & Adaptor 5VDC to EUT
Environmental	Storage Temperature -> -40°C to +70 °C Operating Temperature-> -20°C to 50°C in a humidity up to 95% noncondensing

Test Conditions:

Supply Voltage: 3.7- 4.2 VDC & Adaptor 5VDC to EUT

Environmental conditions:

Temperature: +25 ° C RH: 62%

www.tuv.com

Equipment used for testing as identified in below Table.

Equipment Used for	S/N Number	IMEI No.	Hardware Version	Software version
Conducted Measurement on Antenna Port	6G010057	911381250014927 & 911381250014935	Engineering Sample	Android 5.1.1, LMY47V'
Radiated Mode Test	6G010310	911381250019983 & 911381250019991	Engineering Sample	Android 5.1.1, LMY47V'

Summary of Measured Power & Emission Designator:

Mode	Measured Output Power Conducted Mode		Measured Output Power (dBm) Radiated Mode	Power Class	Maximum Power Level (PCL)	Emission Designator
	dBm	Watt				
GSM 850	31.42	1.3868	26.00	4 (2Watt)	5	245KGXW
GPRS 850	31.34	1.3614	23.50	4 (2Watt)	5	249KGXW
E-GPRS 850	27.95	0.6237	20.62	4 (2Watt)	5	245KG7W
GSM 1900	27.49	0.5610	27.45	1 (1Watt)	0	247KGXW
GPRS 1900	27.37	0.5458	26.53	1 (1Watt)	0	248KGXW
E-GPRS 1900	26.21	0.4178	26.51	1 (1Watt)	0	253KG7W

Note: Product Rugged 7" Tablet has multiple protocols. All the supported wireless protocols and their respective test reports are as in the below table.

Radio Protocol	Report Number
NFC	19660243 001
Wi-Fi (IEEE 802.11bgn)	19660240 001
BLE	19660242 001
Bluetooth (BDR+EDR)	19660241 001
W-CDMA	19660245 001
LTE	19660246 001

www.tuv.com

Test Set-up and Operation Mode

Principle of Configuration Selection

Transmission was enabled with help of CMW500 on low, mid and high channel

Test Operation and Test Software

No Special Test software used for enabling the Transmission, SIM inserted in EUT to communicate with CMW500 simulator

Special Accessories and Auxiliary Equipment

- None

Countermeasures to achieve EMC Compliance

A ferrite bead was used on the USB cable which is connected to the adaptor (accessory) closer to the DUT during testing. Refer appendix 1 for test setup photos.

Ferrite no. 742 711 12 & 742 717 33 (make: Würth Electronics).

Test Modes – Data Rates and Modulations

For Radiated spurious emissions, the tests were performed for all data rates and only worst case results are reported in this report.

GSM/PCS - Frequency List of Low/Mid/High channel				
Frequency Band	Channel/Frequency (MHz)	Low	Mid	High
GSM850	Channel No.	128	190	251
	Frequency	824.2	836.6	848.8
PCS1900	Channel No.	512	661	810
	Frequency	1850.2	1880	1909.8

GSM/PCS Frequency band details

Frequency Band	Uplink Frequency (MHz)	Downlink Frequency (MHz)
GSM850	824.2 – 849.2	869.2 – 893.8
PCS1900	1850.2 – 1909.8	1930.2 – 1989.8

www.tuv.com

Operational description

Whether you're collecting data, crunching numbers or viewing graphics, the Algiz RT7's powerful Qualcomm quad-core processor provides reliable, uninterrupted work performance.

And the Algiz RT7 doesn't just run Android flawlessly — its capacitive touchscreen also enhances the Android experience with five-point multi-touch capability, 600-nit high-brightness sunlight readability and chemically strengthened glass.

Yet the Algiz RT7 also meets stringent MIL-STD-810G military standards for withstanding extreme temperatures, drops and vibrations, and its IP65 rating means it's waterproof and fully protected against sand and dust.

www.tuv.com

Test Methodology

Frequency Range 9 kHz -30 MHz

Test performed as per ANSI C63.10-2013 section 6.4

The loop Antenna was placed at 1m above the ground plane & EUT is 3 meters far from the measuring antenna. With 3m measurement distance, correction data were applied to the measured results. The test arrangement, measuring antenna guidelines and operational configurations in 6.3.1 and 6.3.2, shall be followed. The measurement antenna shall be positioned with its plane perpendicular to the ground at the Specified distance, when perpendicular to the ground plane, the lowest height of the magnetic antenna shall be 1 m above the ground and shall be positioned at the specified distance from the EUT. EUT & its associates are placed on non-conducting table of 0.8m height which is placed on the turn table, For each measurement antenna alignment, the EUT shall be rotated through 0° to 360° on a turntable. The report shall list worst case emission results, for each of the parallel & perpendicular orientations.

Frequency Range 30MHz to 10th harmonics of the highest fundamental frequency

Test performed as per ANSI/TIA-603-D-2010 Clause 2.2.12/17

ERP/EIRP Radiated Power & Radiated spurious emission test are performed as below.

The equipment under test is placed on non-conductive table at 3m away from the receive antenna in accordance with above mentioned standard. Turn table is rotated through 360 degree, and receiver antenna height is varied in order to determine the level of maximum emission. The maximum emission level and position of the maximized emission is recorded with use of spectrum analyzer.

The EUT is substituted by a substitution antenna. The substitute antenna is connected to a signal generator. Adjust the output level of the signal generator to get the same power recorded in with EUT and record the power level of Signal Generator. The cable loss at the test frequency should be compensated

www.tuv.com

The Power is calculated by the following formula

$$P_d \text{ (dBm)} = P_g \text{ (dBm)} - \text{Cable Loss (dB)} + \text{Antenna Gain (dB)}$$

Where

P_d is the dipole equivalent power.

P_g is the generator output power into the substitution antenna

These steps are repeated with the receiving antenna in the both vertical & horizontal polarization

Measurement Method

Substitute measurement method

www.tuv.com

Test Results

**RF Output Power – Conducted Mode
Result**

Pass

Specification	FCC Part 2.1046(a), & RSS 132 Issue 3 section 5.4, SRSP-503 section 5.1.3 & RSS 133 Issue 6 section 4.1/6.4, SRSP-510.5.1.2
Measurement Bandwidth (RBW)	≥ OBW
Detector Function	Peak/Average

Test Setup:

Note: For measurement of RF Output Power, section 5.1 & 5.2 in “971168 D01 Power Meas License Digital Systems v02r02” was used and Attenuator & Cable loss is included in the test results

Specification	FCC Part 2.1051, 22.917(a)(b) 24.238(a) (b) & RSS 132 Issue 3 section 5.5 , RSS 133 Issue 6 section 6.5
Measurement Bandwidth (RBW)	100 kHz/1MHz
Detector Function	Peak
Requirement	Shall be attenuated below the transmitter power (P in watt) by at least $43+10 \log(P)$ dBm,

Test Setup:

Note: For measurement of Conducted Spurious emission test, section 6.0 in “971168 D01 Power Meas License Digital Systems v02r02” was used.

Frequency Stability
Result

Pass

Specification FCC Part 2.1055(a)(2), 22.355, 24.235 & RSS 132 Issue 3 section 5.3 ,
 RSS 133 Issue 6 section 6.3

Requirement Frequency Stability shall be sufficient to ensure that the fundamental
 emission stay within the authorised frequency blok.

Test Setup:

Note: For measurement of Frequency Stability test, section 9.0 in "971168 D01 Power Meas License Digital Systems v02r02" was used.

Frequency Stability on Voltage variation - GSM850

RF Power (ERP/EIRP) – Radiated Mode Result

Pass

Specification	FCC Part 2.1046, 22.913(a) (2) 24.232(c) & RSS 132 Issue 3 section 5.4, SRSP-503 RSS 133 Issue 6 section 4.1/6.4, SRSP-510.5.1.2
Measurement Bandwidth (RBW)	100KHz/1MHz
Detector Function	Peak
Requirement	≤ GSM850 : 7 Watts (38.4dBm) for FCC & 11.5 Watts (40.60dBm) for IC GSM1900 : 2Watts (33dBm)

Note: For measurement of RF Output Power, Test performed as per ANSI/TIA-603-D-2010 Clause 2.2.17.
