1. If you're experiencing interrupted or slow charging, check the following:

- (1) The back of your phone should not have any metal, pop sockets, or credit cards.
- (2) Put the phone in the center of the charging surface (this lets the charging coil in your phone line up with the one inside the wireless charger).
- (3) Phone cases should be no thicker than 5 mm for effective charging.
- (4) Check whether the adapter is QC 3.0 fast charger.

- (1) Please restart your cell phone and test with other Type-C charging cable.
- (2) Please check whether the indicator turns on or not.
- (3) Please check the Adapter is QC3.0 Quick Charger (Output 9V/2A) or not, iPhone original adapter does not match the wireless charger.
- (4) Please check your Phone case thickness($\leq 5\text{mm}$). Metal ring or Magnetic Pad will not be available.

(3) Unplug the adapter and reinsert.

- 4. If the LED light flashes and the wireless charging stand cannot charge your device, how can I deal with this problem?**
1. Before using this wireless iPhone charger, please make sure that your device supports Qi wireless charging function.
 2. Check whether the 3.0 adapter is used for charging.
 3. Check whether there are metal foreign matters in the shell of your equipment. Magnetic and metal accessories will flash the LED and prevent charging.

keep running during charging.

- 6. The phone is charging intermittently, or the indicator light flashes.**
If the charging current is not enough, please use a adapter with sufficient power 9V/2A or 12V/2A above.

If the wireless charger is too hot, please take your phone off it, when the wireless charger is cooled down, please charge it again.

Do not put metal debris or magnetic cards on the charging area. If the product does not work due to overheating, please take off the phone and charge it again when it is cooled down.

1. If you are using iPhone (14 / 13 / 12 series), but you can't charge it, please try restoring your phone and charging again.

10. If there are another problems, please contact our after-sales for solution.

1. This 3-in-1 wireless charging station only supports Apple Watch S8/Ultra/Hermès/S7/S6/S6 SE/S4/S3/S2. (Note: Apple Watch series 1 is not supported)
2. Do not charge the charging station of Apple products from the computer USB interface or other power converters.
3. When charging, place the Qi enabled device in the center of each wireless charging area.
4. Make sure your device is in the middle of the cordless charger area.
5. The silicone shell of iWatch and AirPods may cause abnormal charging. It is best to take it off before charging.

1. Avoid using the product at places that are wet, humid or have high temperature.
2. Avoid dropping the product from high places.
3. Do not disassemble the product by yourselves. Please contact us if necessary.
4. Do not clean the product unless the unit is powered off.
5. It is recommended to use 18W or above adapter to charge 3 smart devices at the same time.

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To maintain compliance with FCC's RF Exposure guidelines, This equipment should be installed and operated with minimum distance between 20cm the radiator your body: Use only the supplied antenna.
