

Changes Declaration Letter

Date: 16. August 2022

Subject: Product Equality Declaration/Re-use of Test Reports

FCC ID: 2AUXS-VCURM1

IC: 25847-VCURM1

HVIN (Model Number): VCURM1

Partly re-use of test reports combined with product specific radiated measurements.

To whom it may concern:

The device with the above product identification is electrically identical to the already certified variant with FCC ID: 2AUXS-VCUMN1 (GRANT 02/16/2022) and IC: 25847-VCUMN1 with HVIN: VCUNM1 (Approval Date 2022-03-17) except following differences:

- Broadcast Receiver (D0310 – TEF7100) is mounted
- additional GNSS Receiver Module (D7000 – UBX-M8030) is mounted

Since the RF parameters of the DSS, DTS and UNII (Band 1 & 4) are neither effected by the described differences nor changed by the responsible party for compliance, the radio reports with number F212286E2 (DSS), F212286E1 (DTS) and F212286E3 (UNII) as used for the certification of the “VCUNM1” in combination with product specific repeated spot checks (DSS, DTS, UNII, sim TX) and new measurements of the broadcast and GNSS receiver are used to show compliance of the “VCURM1” to the regulations.

Thank you for your attention in this matter.

Sincerely,

Signatory

Kai Heinrichs
Graduated Approval Engineer
