

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the back of a black EUT housing with an orange border. The back cover is removed, revealing the internal battery compartment. A black battery is placed next to the housing. A black ruler with white markings is positioned vertically and horizontally for scale. The background is a light blue surface.
EUT Housing and Board View 2	 A photograph showing the internal components of the EUT housing. The black PCB is visible, featuring various electronic components, including a microcontroller, capacitors, and connectors. The orange housing is placed next to the PCB. A black ruler with white markings is positioned vertically and horizontally for scale. The background is a light blue surface.

Solder Board-Component View 3	 A photograph of a small electronic component, likely a camera module, mounted on a blue textured surface. The component is rectangular with a central lens area and two circular components on either side. It is positioned next to a black ruler with white markings. The ruler has two scales: a vertical scale on the left (0 to 100 mm) and a horizontal scale at the bottom (0 to 100 mm). The component is located approximately at the 30 mm mark on the vertical scale and the 40 mm mark on the horizontal scale.
Solder Board-Component View 4	 A photograph of the same electronic component from a different angle, showing the underside or a different side. The component is rectangular with various solder points and components visible. It is positioned next to a black ruler with white markings. The ruler has two scales: a vertical scale on the left (0 to 100 mm) and a horizontal scale at the bottom (0 to 100 mm). The component is located approximately at the 30 mm mark on the vertical scale and the 40 mm mark on the horizontal scale.

Solder Board-Component View 5	 A photograph of a small electronic component, identified as HM-A300E-LCD, mounted on a blue textured surface. The component is a small black rectangular chip with gold-colored solder pads. It is positioned next to a black L-shaped ruler with white markings in millimeters. The ruler is placed horizontally and vertically to provide scale. The component is located at approximately 10 mm on the vertical ruler and 30 mm on the horizontal ruler.
Solder Board-Component View 6	 A photograph of the same electronic component, HM-A300E-LCD, from a different perspective. The component is a small black rectangular chip with gold-colored solder pads. It is positioned next to a black L-shaped ruler with white markings in millimeters. The ruler is placed horizontally and vertically to provide scale. The component is located at approximately 10 mm on the vertical ruler and 30 mm on the horizontal ruler.
