

Quick Start Guide

Note: Read this guide online at [tractive.com/quick-start](https://www.tractive.com/quick-start)

1 Charge with provided USB cable

Firmly snap the charger to your tracker. You should hear a click when it's connected properly. Red light shows battery is charging. When 100% charged, it turns green.

Charge at least 2 hours before first use.

2 Turn on tracker

Your tracker will turn on while charging, and stay on until you turn it off. You can double check if the tracker is on by pressing the power button shortly.

Press and hold power button to turn **on/off**. Press **shortly** to check **device status**.

Light **blinks twice** if tracker is turned on.

First blink **(1)** shows network status, and second blink **(2)** shows GPS status.

(1) (2)

- Network OK - GPS OK
- No network - GPS OK
- Network OK - no GPS
- No network - no GPS
- In a Power Saving Zone

3 Download the Tractive GPS app

Download the Tractive GPS app for iOS or Android. You can also track at my.tractive.com, but won't have access to all Tractive features.

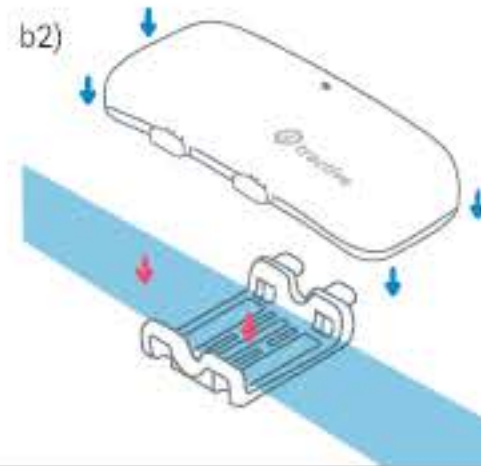

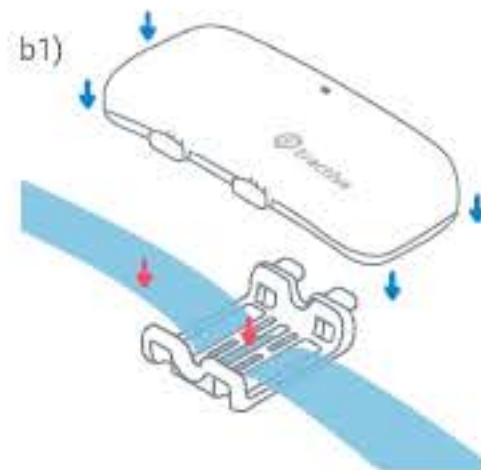

4 Activate with your tracker ID

Use the 8-character ID on the back of your tracker, and follow the instructions on the app or at my.tractive.com.

5 Attach to collar

- a) Remove your pet's collar and continue according to the collar width.
- b1) **For collar widths of 1.5cm or less:** Remove rubber clip from tracker. Put collar through the rectangle-shaped holes on sides of rubber clip. Fasten rubber clip to tracker.
- b2) **For collar widths above 1.5cm:** Remove rubber clip on one side of tracker. Place collar between rubber clip and tracker. Close rubber clip again.
- c) Put your pet's collar back on and you're good to go.

Happy Tracking!
