RE: Class II Permissive Change for FCC ID: KNYPMT0101AB, Granted: 06/30/2016

To Whom It May Concern:

We, FreeWave Technologies, are submitting an application for Class II Permissive Change against FCC ID: KNYPMT0101AB.

There are no hardware or electrical modifications made to the ZumLink 900 Series family.

The changes filed under this application are: (list each change as a bullet point)

- The improvement made by lowering the bitrate of the 250Kbps and 500Kbps data rates allowed us to use a much narrower receive filter, which improves the sensitivity and selectivity of the receiver. There was a limitation that forced us to use a receive filter bandwidth that was about 2 times larger than desired with the previous bit rates.
- Added additional 1500Kbps data rate.

Note: Above changes were implemented via software.

Please contact me if you have any questions or need further information regarding this application.

Sincerely,

Riaz Momand
