

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup	 A photograph showing a conducted emission test setup. On the left, a piece of electronic equipment sits on a light-colored wooden bench. To its right, a power supply unit is connected to a wall outlet. On the right, another wooden bench holds a power strip and a black device. Cables connect the various components.
Radiation Emission Test Setup (Below 30MHz)	 A photograph of a radiation emission test chamber. The interior walls are lined with white, square-shaped electromagnetic interference (EMI) absorbers. A black metal frame stands in the center, and a white table is positioned in the foreground. A bright light source is visible in the upper left corner of the chamber.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test chamber. The walls are covered with white, square-shaped absorbers. A metal rod with a bright light source at its end is positioned diagonally across the frame. A white, rectangular test fixture is visible in the background.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test chamber. The walls are covered with white, square-shaped absorbers. A white, rectangular test fixture is placed on a white, rectangular stand. A red, curved object is visible on the left side. The floor is covered with blue, conical absorbers.

**Radiation Emission Test
Setup (Above 18GHz)**

*** Means' only test and setup for PART 15C .**
