

## Antenna Specification

|              |                                                                                                                                               |          |          |
|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------|----------|----------|
| Model Name   | 1.9G DECT ANT-PU (PIP15 MULTI)                                                                                                                |          |          |
| Frequency    | 1920MHz                                                                                                                                       | 1925MHz  | 1930MHz  |
| Gain (dBi)   | 1.19 dBi                                                                                                                                      | 1.28 dBi | 1.24 dBi |
| MAX. Gain    | 1.28 dBi                                                                                                                                      |          |          |
| Impedance    | 50 $\Omega$                                                                                                                                   |          |          |
| Manufacturer | Meizhou Guo Wei Electronics Co., Ltd.<br>AD1 Section, Economic Development Area, Dongsheng<br>Industrial District, Meizhou, Guangdong, China. |          |          |

## Antenna Photo & Length (mm)
