

Solder Board-Component View 11	 A photograph of a small, rectangular electronic component, likely a solder mask or a component on a board, placed on a blue textured surface. The component is dark with some gold-colored contacts at the top. It is positioned next to a ruler for scale. The ruler has markings in centimeters (0 to 9) and millimeters (0.5 mm to 15 mm).
Solder Board-Component View 12	 A photograph of the same electronic component from a different angle, showing the underside or a different side. The component is dark with visible circuitry and gold-colored contacts at the top. It is positioned next to a ruler for scale. The ruler has markings in centimeters (0 to 8) and millimeters (0.5 mm to 15 mm).

Solder Board-Component View 13	 A photograph of a black printed circuit board (PCB) with various electronic components, including a large integrated circuit (IC) and several smaller components. The board is placed on a blue textured surface. A metal ruler is positioned vertically to the left of the board, showing measurements in centimeters (1 to 8) and millimeters (0.5 mm). Another metal ruler is positioned horizontally below the board, showing measurements in millimeters (1 to 14).
Antenna View	 A photograph showing the antenna components of the device. On the left is a black rectangular antenna module with four circular patches. On the right is a yellow rectangular antenna module. A red box highlights the black module, and a red line points from the label "GPS Ant" to it. Another red line points from the label "LTE Ant" to the bottom edge of the black module. A metal ruler is positioned vertically to the left of the modules, showing measurements in centimeters (1 to 10) and millimeters (0.5 mm). Another metal ruler is positioned horizontally below the modules, showing measurements in millimeters (1 to 60).
