

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of a mobile phone, specifically the housing and the main board. The components are laid out on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, with markings from 0 to 100 mm. The main board is black and features the "BLU smartphones" logo. The housing is also black and has a circular cutout for the camera lens. The background is a solid blue color.
EUT Housing and Board View 2	 A photograph showing the internal components of a mobile phone, specifically the housing and the main board. The components are laid out on a blue surface next to a black ruler with white markings. The ruler is oriented vertically, with markings from 0 to 100 mm. The main board is black and features the "BLU smartphones" logo. The housing is also black and has a circular cutout for the camera lens. The background is a solid blue color.

EUT Housing and Board View 3	 A photograph showing the internal components of a smartphone, including the battery, circuit board, and housing, placed next to a ruler for scale. The battery is labeled "BLU smartphones".
Solder Board-Component View 1	 A close-up photograph of a small electronic component, likely a motor, soldered onto a green printed circuit board (PCB). The component is labeled "MOTOR" and "100% SOLDER". A ruler is visible in the background for scale.

Solder Board-Component View 2	 A photograph of a small green printed circuit board (PCB) component, likely a USB connector, positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the component, showing measurements from 0 to 100 mm. The component is oriented horizontally, with its gold-plated contacts facing left. A small circular solder joint is visible on the right side of the component.
Solder Board-Component View 3	 A photograph of a larger green printed circuit board (PCB) component, likely a USB connector, positioned on a blue textured surface. A black ruler with white markings is placed vertically to the left of the component, showing measurements from 0 to 100 mm. The component is oriented horizontally, with its gold-plated contacts facing left. The board features various electronic components, including a large copper-colored area in the center, a USB Type-C port on the right, and several other connectors and components along the edges.
