

American Telecommunications Certification Body Inc.
6731 Whittier Ave, McLean, VA 22101

May 23, 2006

RE: BenQ Corporation

FCC ID: JVPE61A

I have a few comments on this Application. Depending on your responses, kindly understand there may be additional comments.

- 1.) Does this device contain a Bluetooth transmitter? If so, then a corrected Form 731 and all accompanying Exhibits for a Bluetooth submission must be provided. This includes, Bluetooth schematics, block diagram, operational description, and test report.
- 2.) Kindly explain why for body SAR testing only the keypad down position was checked for Bluetooth operations.
- 3.) Was this device tested in three orthographic planes? Only a single position is shown in the test setup photograph. FYI: In the future, kindly take greater care with the test setup photographs – the ones supplied are very difficult to view.
- 4.) FYI: If Bluetooth certification is required, please remember to supply test setup photos for powerline conducted testing.
- 5.) Please supply Part 24 temperature testing from -30C to +50C.

William H. Graff
President and Director of Engineering

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
