Attach: Tag Tester User Guide R094.pdf
Subject: Fw: EXI Wireless Systems FCC ID: HE7TTG

Good morning Barry:

Here are the answers to your questions:

1. 'Label Details' – The labels are manufactured using the Brother International Corp. P-touch Pro label maker, Model PT 9200PC with the type TZ tape. They are a laminated peel and stick label.
2. Attached is the revised user guide with the 15.21 statement included.
3. Yes, new batteries were used for testing.
4. Yes, we confirm that the device was rotated through three axis.

I trust the above will enable you to complete this submission.

Thanks,
 Ruby

Ruby,

Re: 1) 'Label Details' – The labels are manufactured using the Brother International Corp. P-touch Pro label maker, Model PT 9200PC with the type TZ tape. I don't have material details, but I would expect Curtis-Straus to be cognizant of this product.

Re: 2) attached is the User Guide with the added notice regarding modification of the device.

Regards,
 Bruce

Importance: High

Good afternoon Bruce:

Happy New Year to you!

I received the following email from Curtis-Straus this afternoon (see below). Please provide me the answer to question 1. For question 2, please add the 15.21 statement to your users guide and email it to me. I have attached 15.21 for your reference. We will answer questions 3 & 4.

Thanks,

Ruby

Hi Ruby,

We have completed our review of the application and have identified the following issues:

1. Please supply details of the label material and adhesive so we can check compliance with 2.925.

2. The user manual does not contain the 15.21 statement.
3. Please confirm new batteries were used for the testing.
4. Please confirm that the device was rotated through three axis to maximize emissions.

Best regards
