About this guide.....	i
-----------------------	---

Chapter 1. Get started..... 1

1.1 Overview	1
1.2 Buttons	1
1.3 Assemble your device	2
1.4 Initial setup	3
1.5 Charge your phone.....	4

Chapter 2. Basics..... 5

2.1 Touchscreen gestures	5
2.2 Home screen.....	8
2.3 Access applications.....	10
2.4 Status bar	10
2.5 Notification Panel	11
2.6 Quick Settings Panel.....	12
2.7 Type text.....	12
2.8 Take a screenshot	13
2.9 Configure your fingerprint.....	14
2.10 Configure your face data	15
2.11 Split-screen mode.....	15

Chapter 3. Network and Share..... 19

3.1 WLAN.....	19
3.2 Mobile data	20
3.3 Connect to computer.....	20
3.4 Bluetooth	21
3.5 Share your mobile data with other devices	21
3.6 Smart WLAN	22

Chapter 4. Calls..... 24

4.1 Make a call	24
4.2 Answer or reject a call	25
4.3 Options during a call	26

4.4	Call log.....	27
4.5	Manage contacts.....	28
4.6	Harassment filter.....	28
4.7	Call settings.....	29
4.8	Advance settings.....	30
4.9	Contacts.....	31

Chapter 5. Messages 33

5.1	Type of messages.....	33
5.2	Send and reply to a message.....	33
5.3	Search for messages.....	34
5.4	Manage your messages.....	34

Chapter 6. Camera and Photos..... 36

6.1	Camera at a glance.....	36
6.2	Take a photo.....	37
6.3	Record a video.....	37
6.4	Shooting modes.....	37
6.5	Camera and video settings.....	39
6.6	Photos.....	40

Chapter 7. Videos 41

7.1	Play a video.....	41
7.2	Video management.....	41

Chapter 8. Clock 43

8.1	Alarm.....	43
8.2	Worldclock.....	44
8.3	Stopwatch.....	44
8.4	Timer.....	45
8.5	Settings.....	45

Chapter 9. Browser..... 46

9.1	Go to a webpage.....	46
9.2	Browser tabs.....	47

Chapter 10. Google Play Store 48

10.1	Add an account to your Google Play Store.....	48
10.2	Download and install applications	48

Chapter 11.Themes 49

11.1	Change the theme	49
11.2	Change the wallpaper	49
11.3	Change lock screen style	50
11.4	Change the icon style	50

Chapter 12.Weather 51

12.1	Check the weather	51
12.2	Weather settings	51

Chapter 13.Calendar..... 52

13.1	Use the calendar	52
13.2	Calendar settings.....	53

Chapter 14.Notes..... 54

14.1	Compose a new note.....	54
14.2	Note options.....	54
14.3	Manage notes.....	55

Chapter 15.File Manager 57

15.1	Create a folder	57
15.2	View files.....	57
15.3	Manage files	57
15.4	File sharing.....	58

Chapter 16.Tools 59

16.1	Sound Recorder	59
16.2	FM Radio.....	60
16.3	Compass.....	61
16.4	Downloads.....	61
16.5	SIM Toolkit	61
16.6	Feedback	61
16.7	Calculator.....	62

Chapter 17.Settings. 63

17.1	Enter settings	63
17.2	Search settings.....	63
17.3	Dual SIM and network	63
17.4	Data usage.....	64
17.5	More connection settings	65
17.6	Sounds, vibration and Do not disturb	65
17.7	Display.....	66
17.8	Notifications	67
17.9	Apps.....	67
17.10	Permissions	68
17.11	App Cloner.....	68
17.12	Screen lock, fingerprint and security	68
17.13	System navigation.....	70
17.14	Gestures and smart assistance	72
17.15	Battery.....	73
17.16	Storage	74
17.17	Users	75
17.18	Accounts.....	76
17.19	Location	77
17.20	Languages and input.....	77
17.21	Date and time.....	78
17.22	Backup and reset.....	78
17.23	System update	78
17.24	About phone.....	79

Appendix A: Specifications 81

Appendix B: Technical Support 83

Appendix C: Explanation of the symbols on the product label 87

About this guide

This guide is a complement to Quick Start Guide. The Quick Start Guide provides instructions for quick setup, while this guide provides details of each function and shows how to configure the smart phone appropriate to your needs.

When using this guide, please notice that features of the device may vary slightly depending on the model and software version you have, and on your location, language, and Internet service provider. All screenshots, images, parameters and descriptions documented in this guide are used for demonstration only.

Conventions

In this guide, the following conventions are used:

Convention	Description
Smart phone/phone	Stands for Neffos C7A without any explanation.
Parameters	Parameters provided in the screenshots are just references for configuring the smart phone, which may be different from the actual situation. You can set the parameters according to your demand.
<u>Underlined</u>	Italic and underlined words or phrases are hyperlinks. You can click to redirect to a specific section for more details.
Screenshots	The demonstrated screenshots may look a little different from the actual UI of your smart phone due to the various firmware versions. Please just configure your phone based on the actual UI.
->	The menu structure which shows the path to enter the corresponding page. For example, Settings -> WLAN means the WLAN function page is under the Settings menu.
Note:	Ignoring the notes in the guide might result in a malfunction or damage to the device.

1 Get started

This chapter introduces the smart phone's hardware information and guides you how to assemble your phone when you get started on using your new phone.

- [Overview](#)
- [Buttons](#)
- [Assemble your device](#)
- [Initial setup](#)
- [Charge your phone](#)

1.1 Overview

1.2 Buttons

The buttons you use with Neffos include virtual ones and physical ones.

Power button

- **Lock Neffos:** Locking your phone puts the display to sleep, saves the battery and prevents unmeant operationson the screen. You can still receive phone calls, text messages, alarms and notifications as well as listening to music and adjusting the volume. Press the Power button to manually lock the screen. Neffos locks the screen automatically in a given period of inactivity.
- **Unlock Neffos:** Press the Power button to wake the screen.

- **Turn Neffos on:** Press and hold the Power button until your phone vibrates and the screen turns on.
Note:
 If your device displays the shut down notice after the screen turns on, the battery is empty. Connect your phone to a charger to charge the battery, otherwise your phone will shut down in 30 seconds.
- **Turn Neffos off:** Press and hold the Power button, then tap .
- **Reboot Neffos:** Press and hold the Power button, then tap .

Volume button

- Press the Volume-up or Volume-down button to adjust the audio volume when you're on the phone, listening to songs, watching movies or using other media.
- Press the Volume button to take a picture or record a video. Refer to [Take a photo](#) and [Record a video](#) to learn more.
- Press the Power button and Volume-down button at the same time to take a screenshot.

Navigation buttons

- **Home button**
 Tap Home button to return to the default Home screen.
 Touch and hold Home button to open Google™ search.
- **Back button**
 Tap Back button to return to the previous screen or close an application. When entering text, tap Back button to close the onscreen keyboard.
- **Recent apps button**
 Tap Recent apps button to display recently used applications.
 Double-tap Recent apps button to switch to the previous application.

1.3 Assemble your device

Remove the back cover

Hold your phone face down, put a fingernail in the bottom corner hole in the cover and pry the back cover off.

Note:

Do not bend or twist the back cover excessively in case you damage the phone.

Insert the Micro SIM card, Normal SIM card and MicroSD card (optional)

Carefully slide the cards into the card slots with the gold contacts facing down. Since your phone is a dual SIM phone, you can use one or two SIM cards by putting them in the corresponding card slots.

Note:

1. The device supports one Micro SIM card and one Normal SIM card.
2. If the card is not inserted correctly, the phone will not detect them.

Insert the battery

Insert the battery into the opening on the back of the phone, aligning the gold contacts on the battery with the gold contacts in your phone. Then gently press down to secure the battery.

Replace the back cover

Align the cover and press all the way around the cover's edges, making sure it snaps into place.

1.4 Initial setup

It is recommended to insert your SIM card before you start the initial setup.

Press and hold the Power button to turn on your phone, and then follow the onscreen instructions to complete the initial setup.

■ Note:

To avoid low battery power, your phone will shut down automatically if not operated in 30 minutes.

1. Select your language and location, and then tap ➤.
2. Proceed to **Connect to mobile network** screen.

If you insert two SIM cards, follow the onscreen instructions to finish dual-SIM settings. You can always adjust dual-SIM settings in ⚙ **Settings** -> **Dual-SIM & network**.

Your phone will automatically list available WLAN networks. Select the network you want to connect to (If you want to view more Wi-Fi networks, tap **See all Wi-Fi networks**), and then enter the password to access the Internet (This can take up to 2 minutes). If you have activated mobile data services with your carrier, you can tap **Use cellular network for setup**. Or if you don't want to connect to network, just tap **SKIP** -> **CONTINUE** to skip this step.

■ Note:

Using cellular network for setup may result in additional fees. Contact your carrier for information about your cellular data plan rates.

3. If you don't connect to any networks, your device will proceed to **Date & time** screen. Set the date and time, then tap **NEXT**. You also can tap **NEXT** directly to skip this step. You can always adjust date and time in  **Settings** -> **More general settings** -> **Date & time**.
4. Proceed to **Name** screen. Add your name to allow your phone to personalize some apps. Your name will be saved as **ME** in  **Contacts**. Then tap **NEXT** after finishing. If you don't want to set now, tap **NEXT** directly. You can always set your name in  **Contacts** -> **Set up my profile**.
5. Proceed to **Protect your phone** screen. Select a device protection feature and then follow the onscreen instructions to complete. If you don't want to set now, choose **Not thanks** and tap **NEXT** -> **SKIP ANYWAY**. You can always set your device protection in  **Settings** -> **Security** -> **Screen lock**.
6. Proceed to **Register fingerprint data** screen. Select **Register fingerprint** and then follow the onscreen instructions to complete. If you don't want to register now, choose **Not thanks** and tap **NEXT** to skip.
7. Proceed to **Register face data** screen. Select **Register fingerprint** and then follow the onscreen instructions to complete. If you don't want to register now, choose **Not thanks** and tap **NEXT** to skip.
8. Proceed to **Google services** screen. Read the Google terms and conditions, then tap **I AGREE**.
9. Proceed to **Anything else** screen. You can set up a few more things there, or you can just skip by tapping **NO THANKS**.
10. Proceed to **Terms And Conditions** screen. Carefully read the terms and conditions and then tap **AGREE**.
11. Setup completed. Tap **START USING YOUR PHONE** to start using your phone.

1.5 Charge your phone

Your device displays a low battery warning when the battery is nearly empty. Charge your device immediately to prevent it from switching off automatically.

Use the charger to charge your device

Connect the device to a power outlet using the included USB cable and power adapter.

Use a USB port to charge your device

If you do not have access to a charger, you can charge your device by connecting it to a computer with a USB cable.

■ Note:

1. When charging your phone, only use genuine Neffos batteries, chargers, and USB cables. Third-party accessories are a potential safety hazard and may impair your phone's performance.
2. Avoid using your phone when it is charging. Do not cover your phone or the power adapter.
3. It is entirely normal that your phone may become warm after prolonged use or when exposed to high ambient temperatures. If your phone becomes hot to the touch, stop charging it and disable unnecessary features. Place your phone in a cool location and allow it to cool down to room temperature. Avoid prolonged contact with the surface of your phone if it becomes hot.
4. A low battery warning will be displayed when the battery level is low. Your phone will turn off automatically when the battery is nearly empty.

2 Basics

Learn about your smart phone's basic feature.

- [*Touchscreen gestures*](#)
- [*Home screen*](#)
- [*Access applications*](#)
- [*Status bar*](#)
- [*Notification Panel*](#)
- [*Quick Settings Panel*](#)
- [*Type text*](#)
- [*Take a screenshot*](#)
- [*Configure your fingerprint*](#)
- [*Configure your face data*](#)
- [*Split-screen mode*](#)

2.1 Touchscreen gestures

Use simple touchscreen gestures to perform a variety of tasks, such as opening applications, scrolling through lists, and zooming images.

Tap: Simply tap an item once. For example, tap to select an option or open an application.

Double-tap: Tap the target area of the screen twice in quick succession. For example, double-tap an image in full screen mode to zoom in or zoom out.

Touch and hold: Touch and leave your finger on the screen for 2 seconds or more to activate onscreen items. For example, touch and hold a widget on the Home screen to move it.

Swipe: Place your finger on the screen, and drag your finger to the direction you want. For example, you can swipe to scroll through the Home screen or a list.

Drag: Touch and hold an item and then move it to another position. For example, you can rearrange applications and widgets on the Home screen.

Pinch fingers together: Pinch two fingers together on the screen. For example, pinch two fingers together to zoom out on a picture.

Spread fingers apart: Spread two fingers apart on the screen. For example, spread two fingers out to zoom in on a picture.

Slide three fingers: Slide down three fingers on the screen to take a screenshot.

2.2 Home screen

Your Home screens are where you can find your favorite widgets and all your applications.

Organize widgets on the Home screen

- [Add a widget to the Home screen](#)

Add frequently used widgets to the Home screen for quick access.

1. On the Home screen, touch and hold a blank area (or pinch two fingers together) on the screen to access the Home screen editor.
2. Tap  **Widgets** and select a widget. Tap the widget to add to the Home screen and drag it to a blank area you like. Or you can just touch and hold the widget to drag it to target area.
3. Tap a blank area on the Home screen (or tap Home Button/Back button) to quit the Home screen editor.

■ Note:

1. You must have enough space on the Home screen to add widgets. If there is not enough space, add another Home screen (see [Add a Home screen](#)) or free up some space.

- [Move a widget](#)

On the Home screen, touch and hold an widget and then drag it to the desired location.

- [Delete a widget](#)

On the Home screen, touch and hold the widget you want to delete and then move it to **Remove** in the status bar.

Organize folders on the Home screen

- [Create a folder](#)

Create Home screen folders to organize your applications as desired. For example, you can create a Camera folder that contains all of your camera applications.

1. On the Home screen, drag an icon onto another icon to create a folder containing both applications.
2. To name the new folder, open the folder, tap **Unnamed Folder** and enter the folder name.

- [Rename a folder](#)

On the Home screen, open the folder and touch the folder name, then enter the new name.

- [Add apps to a folder](#)

On the Home screen, touch and hold the application you want to remove, then drag it to the folder you want to add it to.

- [Remove apps from a folder](#)

1. On the Home screen, open the folder.
2. Touch and hold the application you want to remove, then drag it out of the folder.

- [Delete a folder](#)

You can delete a fold in two ways:

- On the Home screen, open the folder. Remove all the applications in it, then the folder will be automatically deleted.
- Touch and hold the folder and drag it to **Remove** in the status bar. The folder and icons in it will be deleted together.

Organize applications on the Home screen

- [App pop up box](#)

On the Home screen, touch and hold an application to open the pop up box. You can:

- [View App info](#): Tap **App info** or .
- [Use shortcut to go to the screen you want to go quickly](#): Tap the shortcut.

- **Add the widget to Home screen:** Tap **Widgets** or . Touch and hold the widget to add it to the Home screen.
- **Add the shortcut to Home screen:** Touch and hold the shortcut to add it to the Home screen.
Note:
Widget and shortcut only appear when the app includes related content.
- **Notification dot**
Touch and hold the app with notification dot to view the notification. Tap to open and swipe left or right to remove the notification.
- **App drawer**
On the Home screen, tap  or swipe up on the dock component bar to expand app drawer. All of your applications sorted by name. You can tap  to search the App you need.
- **Move an application**
On the Home screen, touch and hold an application and then drag it to the desired location.
- **Add an app icon to the Home screen**
 1. On the Home screen, tap  or swipe up on the dock component bar to expand app drawer.
 2. Touch and hold an app and drag it to a blank area you like.
- **Uninstall an application**
On the Home screen, touch and hold the application you want to remove, then drag it to **Uninstall** in the status bar.
Note:
Some pre-installed system applications cannot be removed.
- **Batch moving icons**
 1. On the Home screen, touch and hold a blank area on the screen (or pinch two fingers together) to access the Home screen editor.
 2. Tap  **Adjustment**. Tap or drag the icons to put them in the adjustment at the bottom.
 3. Swipe left or right to choose the target Home screen.
 4. Tap or drag the icons in adjustment to add them to the target Home screen.
 5. Tap a blank area on the Home screen (or tap Home Button/Back button) to quit the Home screen editor.

Manage Home screen

On the Home screen, touch and hold a blank area on the screen (or pinch two fingers together) to open the Home screen editor. You can:

- **Add a Home screen**
Swipe left and tap  on the rightmost screen to add a new screen.
- **Delete a Home screen**
Tap  on the Home screen to delete it.
Note:
Only blank Home screen can be deleted.
- **Adjust screen order**
Touch and hold the screen you want to move and drag left or right to adjust page order.
- **Set the default home screen**
Tap  at the top of a Home screen to set the chosen Home screen as default. On the default Home screen,  will display at the top.

Set the Home screen wallpaper

1. On the Home screen, touch and hold a blank area (or pinch two fingers together) to open the Home screen editor.

2. Tap  **Wallpapers**, and follow the onscreen instructions to set the picture as the Home screen or lock screen wallpaper (or both).

You also can set the Home screen wallpaper on  **Themes** (see [Change the wallpaper](#)), or go to  **Settings** -> **Display** -> **Wallpaper**.

Home screen settings

On the home screen, touch and hold a blank area (or pinch two fingers together) on the screen to access the Home screen editor. Then tap  **Settings**, you can:

- **Manage notification dots:** Tap **Notification dots**. You can choose the dot style and toggle the switch to enable or disable the function.
- **Enable or disable app drawer:** Tap **App drawer** and tap to turn on or turn off App drawer.
- **Add icons to the Home screen automatically:** When you turn on the switch, the new apps downloaded from Play Store will be added to Home screen automatically.

2.3 Access applications

Launch and switch between applications

- **From the Home screen:** Tap an icon to launch the corresponding application.
- **From the Locked screen:** Swipe up  to launch the camera application. Swipe up  to open the toolkit.
- **Switch to another application:** Tap the Home button to return to the Home screen, and then tap the icon of the application you want to open. Or you can tap Recent apps button to view the recently used applications, then tap the application you want to open. Double-tap Recent apps button to switch to the previous application.

Viewing recently used applications

Tap Recent apps button to display the list of recently used applications.

- **View more applications:** Swipe up or down on the screen to view more recently used applications.
- **Open an application:** Tap a thumbnail to open the corresponding application.
- **Close an application:** Swipe left or right on a thumbnail to close the corresponding application, or you can tap  on a thumbnail to close it.
- **Close all applications:** Tap  to close all applications.

2.4 Status bar

Use the status bar to access the Quick Settings Panel, Notification Panel and check your phone's status.

Status icons

Status icons are displayed on the right-hand side of the status bar and tell you about your phone's status, including network connections, signal strength, battery, and time.

Status icons	Indications
	Battery low
	Charging
	Battery full
	Battery saver enabled

	Signal strength
	No signal
E	Connected over GPRS
3G	Connected over 3G
4G	Connected over LTE
	Headset mic inserted
	WLAN connected
	Vibrate mode enabled
	Bluetooth enabled
	Hotspot enabled
	No SIM card installed
	Do not disturb enabled
	Airplane mode enabled
	Data saver enabled
	Alarms enabled

Notification icons

Notification icons are displayed on the left-hand side of the status bar when you receive a new message and other notifications.

Notifications icons	Indications
	Downloading status
	Uploading data
	Download complete
	Call in progress
	Missed calls
	New messages
	Hotspot enabled
	Connected to a PC using USB cable

2.5 Notification Panel

Notification Panel collects all the notifications and alerts so that you can review them whenever you like.

- **Open Notification Panel:** Swipe down from the status bar to open the Notification Panel.
- **View a notification:** Tap an item to view the details. New notifications, such as missed calls and messages are displayed on the Lock screen. From the Lock screen, double-tap it to view the details, or swipe left or right to remove it.
- **Clear notifications:** Swipe the notification left or right to remove the it from the list. You can also tap  to remove all the notifications at once.
- **Quickly manage notification:** Touch and hold the notification detail to open the quick settings screen. Tap **MORE SETTINGS** to go to the notification management page. For more information, see [Notifications](#).
- **Close Notification Panel:** Swipe up, or tap the Home button/Back button.

2.6 Quick Settings Panel

Use shortcut switches on the Quick Settings Panel to enable or disable functions quickly without using a settings menu.

- **Open the Quick Settings Panel:** Swipe down twice from the status bar, or swipe down and tap ▼ to open the Quick Settings Panel. On the Lock screen, swipe only once to open it.
- **Use shortcut switches:** Tap the shortcut switches on the Quick Settings Panel to turn the functions on or off. Touch and hold the shortcut icon to enter the feature's settings page.
- **Close the Quick Settings Panel:** Swipe up, or tap the Home button/Back button.

Adjust the position of shortcut switches

Open the Quick Settings Panel and tap  to enter the edit page. You can:

- **Rearrange shortcut switches:** Touch and hold a shortcut switch and then drag the icon to a position of your choice.
- **Add a shortcut switch:** Drag a shortcut switch from the bottom section of the panel to the top section.
- **Remove a shortcut switch:** Drag a shortcut switch from the top section of the panel to the bottom section.
- **Reset Quick Settings Panel:** Tap  -> **Reset** to reset the Quick Settings Panel to default settings.

2.7 Type text

Enter text

The keyboard enables you to enter text when needed. Your phone use Touchpal by default.

Touch and hold the letter to enter the number or symbol next to it.

Spell checker

You can turn on the Spell checker feature to help you enter correct words.

1. Go to  **Settings** -> **More general settings** -> **Languages & input** -> **Spell checker**.
2. Turn on the switch.

Switch input method

1. On the Home screen, tap  **Settings** -> **More general settings** -> **Languages & input** -> **Virtual keyboard**.
2. Select an input method you need. By default, you can choose Touchpal, Android™ keyboard or Google Voice Typing.

2.8 Take a screenshot

Capture the entire screen

You can capture the entire screen by following ways:

- Press the Power button and Volume-down button at the same time.
- Open the Quick Settings Panel, then tap  **Screenshot**.
- Slide down three fingers on the screen.
- If you enabled float button (see [Float button](#)), tap  ->  **Screenshot**.

Take scrolling screenshots

Use scrolling screenshots to take screenshots longer than one page (such as web pages or conversation threads).

1. Take a full screenshot for the entire screen first.
2. To take a scrolling screenshot, ensure that you touch the thumbnail within 3 seconds after taking the screenshot. Tap the  below the thumbnail of the scrollshot. The screen will scroll down and capture all of the content in one screenshot. Tap the screen to stop scrolling and capture the preceding content.

Edit/Share/Delete the screenshot

Tap the thumbnail after capturing the screen, you can:

- Edit the screenshot: tap .
- Share the screenshot: tap .
- Delete the screenshot: tap .

2.9 Configure your fingerprint

Use the fingerprint sensor to unlock the screen, take photos and unlock apps.

Add a fingerprint for the first time

For added security and to ensure that you can still access your data if your phone fails to recognize your fingerprint, you will need to set a backup screen lock method when configuring fingerprint unlock.

1. Go to  **Settings** -> **Screen lock, fingerprint & security** -> **Fingerprint management**.
2. Select Pattern or PIN or Password, and then follow the onscreen instructions to set a screen lock password.
3. Once you have configured the password, tap **Add fingerprint**.
4. Place your fingertip on the fingerprint sensor. Press down lightly on the sensor until your phone vibrates. Repeat this step using different parts of your fingertip until your phone has successfully added your fingerprint.
5. Once you have added your fingerprint, tap **OK**.

■ Note:

1. When recording your fingerprint, make sure the fingerprint sensor and your fingers are dry and clean.
2. For more security settings, see [Screen lock, fingerprint and security](#).

Add, delete or rename your fingerprint

Add multiple fingerprints to make it easier to unlock your phone. You can also delete or rename your fingerprints.

1. Go to  **Settings** -> **Screen lock, fingerprint & security** -> **Fingerprint management**.
2. Enter the screen lock pattern/password/PIN.
3. In the Fingerprint list section, you can:
 - **Add a fingerprint:** Tap **Add fingerprint** to add a new fingerprint. You can add up to five in total.
 - **Rename/delete a fingerprint:** Tap a previously added fingerprint to rename or tap  to delete it.
4. After you enter several fingerprint, there is a list showing all the recorded fingerprint. When you place your fingertip on the fingerprint sensor, the corresponding place turns grey, which helps you easily find the fingerprint.

Use fingerprint to take photos or record videos

When using the camera, tap the fingerprint sensor to take a picture or record a video.

If you don't want to use this function:

- Go to  **Settings** -> **Gestures and smart assistance** -> **Press and hold your fingerprint to capture**, and turn off the switch to disable the function.
- Go to  **Camera**, swipe right and tap , then switch off **Press and hold your fingerprint to capture**.

Access App lock with fingerprint

1. Go to  **Settings** -> **Screen lock, fingerprint & security** -> **Fingerprint management**, and enter the screenlock method you have set.
2. Tap **Access App lock**.
 - If you have enabled App lock before, just switch on **Access App lock**, and then you can use fingerprint to access App lock.
 - If you have not enabled App lock, you need to set a Pattern, PIN or password first. Follow the onscreen instructions to enable App lock.

■ Note:

You can also go to  **Settings** -> **Screen lock, fingerprint & security** -> **App lock** ->  and switch on **Fingerprint verification** to enable using fingerprint access App lock.

1. Go to  **Settings** -> **Screen lock, fingerprint & security** -> **App lock**.
2. Use fingerprints or enter the password.

3. Turn on the switch to enable the app lock for the app you want to lock.

2.10 Configure your face data

Use the facial recognition to unlock your phone.

After waking up your phone screen, you can unlock your phone by looking at the screen.

Add your face data for the first time

For added security and to ensure that you can still access your data if your phone fails to recognize your face data, you will need to set a backup screen lock method when configuring fingerprint unlock.

1. Go to  **Settings** -> **Screen lock, fingerprint & security** -> **Facial recognition**, and choose the appropriate method to add face data.
 - If you have set a pattern, PIN, or password as the screenlock method, enter the screenlock method.
 - If you have not set a pattern, PIN or password as the screenlock method, select one and follow the onscreen instructions to complete.
2. Tap **Add face data** and follow the onscreen instructions to register your face data and enable the facial recognition. Then you can use facial recognition to unlock your phone.

Delete your face data

1. Go to  **Settings** -> **Screen lock, fingerprint & security** -> **Facial recognition**
2. Enter the screenlock method and tap **Remove face data** -> **DELETE**.

2.11 Split-screen mode

Use split-screen mode to use two apps at the same time.

Enable split-screen mode

1. Open an app and tap Recent apps button to open recents apps list.
2. Touch and hold an app, then drag it up. Then you can open another app, and it will be displayed at the bottom of the screen.

■ Note:

Split-screen mode is not available for all apps. Some apps may not function properly in split-screen mode.

Switch to full screen mode

Touch and hold , and swipe it up or down to switch to full screen mode.

Network and Share

Share your phone data with others by various kinds of connections.

- [WLAN](#)
- [Mobile data](#)
- [Connect to computer](#)
- [Bluetooth](#)
- [Share your mobile data with other devices](#)
- [Smart WLAN](#)

3.1 WLAN

Connect to a WLAN network to access the Internet and reduce mobile data usage.

■ Note:

Your personal data and financial information may be at risk if you connect to insecure public WLAN networks.

Connect to a WLAN network

Enable WLAN to connect to the Internet using a WLAN access point or hotspot.

If  appears in the status bar, you are connected to a WLAN network.

1. Swipe down twice from the status bar to open the Quick Settings Panel.
2. Touch and hold  **WLAN** to open the WLAN settings screen.
3. Turn on the switch. A list of available WLAN networks will be displayed.
 - **Refresh the list:** Tap  to refresh the available WLAN list.
 - **Add a WLAN network that is not shown in the list:** Swipe down to the bottom of the list and tap **Add network**. Follow the onscreen instructions to configure the WLAN settings and password.
4. Select the WLAN network you want to connect to, and then enter the password if needed. (You can also turn WLAN on in  **Settings** -> **WLAN**.) Your phone will remember WLAN networks that you have used before and reconnect to them automatically when you enable WLAN.

Connect to a WLAN network through WPS

Connecting to a WPS-enabled router over WPS allows you to quickly connect to the network without entering a password. Go to  **Settings** -> **WLAN** and you can connect to your router in following two ways:

- Tap  -> **WPS push button** and press the router's WPS button.
- Tap  -> **WPS pin entry** to generate a PIN, and then enter the PIN on the router.

Advanced WLAN settings

Go to  **Settings** -> **WLAN** ->  **Advanced**, you can configure these settings:

- **Saved networks:** Tap **Saved networks** to view the networks remembered by your device. Tap a network and tap **FORGET** to forget it.
- **Network notification:** Turn on the switch, and your phone will notify you when a public network is available.
- **Open network notification:** Turn on the switch to enable notifying when a high-quality public network is available.
- **Choose network rating provider:** Tap to choose the provider of network rating. Google is the default provider. You can also choose **None** to choose network rating.
