

## **Request for Class II Permissive Change**

www. silex. jp

November 9, 2016

Federal Communication Commission Equipment Authorization Division Application Processing Branch 7435 Oakland Mills Road Columbia, Maryland 21046

FCC ID: N6C-SXPCEAN2 Applicant: Silex Technology, Inc.

To Whom It May Concern:

This is to request a Class II permissive change for FCC ID: N6C-SXPCEAN2, originally granted on 08/13/2015 and all its permissive changes.

We changed the following points from the original model.

· Client mode setting

(This setting is performed by the module installer professionally from the software of the host device.)

• Add the following antenna \*This antenna is not used for master device.

Antenna type	Sleeve antenna	
Antenna model	ANTDC-081A0	
Antenna gain	2.4GHz	2.0dBi
	W52/53/56/58	2.1dBi

Meanwhile we submit the following documents related to this change. There is no change before and after change except for these documents.

$\boxtimes$	Test Report
$\boxtimes$	External Photo
	Internal Photo
	User Manual
	Label drawing/ location
	Block Diagram
$\boxtimes$	Specification
	Schematic Diagram
	Parts List

This time, we performed the testing and confirmed that this product still meets the minimum requirements of the applicable rules of FCC. Please refer to the test report submitted with this application.

Thank you for your attention to this matter.

Sincerely,

Toshiro Kometani Silex Technology, Inc.
