March 13, 2003

American TCB 6731 Whittier Ave., Suite C110 McLean, VA 22101

Gentlemen:

The attached documentation is provided in support of a formal submission to your organization for FCC Class II Permissive Change certification of an intentional unlicensed transmitter. On behalf of our client, Aegis Labs has included an application for a Grant of Equipment Authorization pursuant to Subpart C of part 15 of FCC Rules (47 CFR) regarding intentional radiators. The data within the test report demonstrates the equipment was tested in a manner described under Part 2 and 15 of the Code of Federal Regulations.

This Class II Permissive Change is for approval of the Intel(R) PRO/Wireless LAN 3A Mini PCI Adapter (MN: WM3A2100, FCC ID: E2K24CLNS) installed in a Dell Latitude Chassis with a Bluetooth module installed, FCC ID: IXMUB22111S. The Bluetooth module was not re-tested, since the transmitting antennas of both the WLAN and Bluetooth modules are approximately 20cm apart. Two sets of antenna types were tested (Triple-Band PIFA and monopole antenna types).

If there are any additional questions or if further information is needed, please contact us at your earliest convenience.

Sincerely,

Candela

Rick Candelas Aegis Labs, Inc. Lab Manager Enclosure (1 Emissions Test Report + Exhibits)
