

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT housing. The green printed circuit board (PCB) is visible, featuring a circular component (likely a battery or sensor) and various electronic components. The white plastic housing is shown next to it. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters (mm) and centimeters (cm).
Solder Board-Component View 1	 A photograph showing the soldered components on the green PCB. The components include a circular component, a small rectangular component, and various electronic components. A black ruler with white markings is placed below the components for scale, showing measurements in millimeters (mm) and centimeters (cm).

Solder Board-Component View 2	 A photograph showing a green printed circuit board (PCB) component with a circular metal pad on its left side. The component is placed on a blue textured surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler has two scales: one from 0 to 100 mm and another from 0 to 60 mm.
Solder Board-Component View 3	 A photograph showing the same green PCB component as in View 2, but with a different soldering configuration. The circular metal pad is now surrounded by a ring of solder. The component is placed on a blue textured surface. A black ruler with white markings is positioned below the component, showing measurements in millimeters. The ruler has two scales: one from 0 to 100 mm and another from 0 to 60 mm.

Solder Board-Component View 4	 A photograph showing a circular component, likely a coin, placed on a blue textured surface. A black ruler with white markings is positioned vertically and horizontally to provide scale. The vertical ruler shows markings from 10 to 80, and the horizontal ruler shows markings from 10 to 100. The component is located near the 10 mm mark on the horizontal ruler and the 20 mm mark on the vertical ruler.
Antenna View	BT Antenna  A photograph showing a green printed circuit board (PCB) with various electronic components. A red box highlights a specific area on the PCB, labeled "BT Antenna". A red line points from the label to the highlighted area. A black ruler with white markings is positioned vertically and horizontally to provide scale. The vertical ruler shows markings from 10 to 100, and the horizontal ruler shows markings from 10 to 100. The PCB is located near the 10 mm mark on the horizontal ruler and the 20 mm mark on the vertical ruler.
