

DRAGONGLASS

Quick Installation Guide

1 Hardware installation

There are two ways to install the network card;

Note: The picture is a simplified schematic diagram, please refer to the actual product for details.

(1) Insert the network card directly into the USB port of the computer;

(2) Connect the computer USB port through the USB extension cord base (USB extension base needs to be purchased separately);

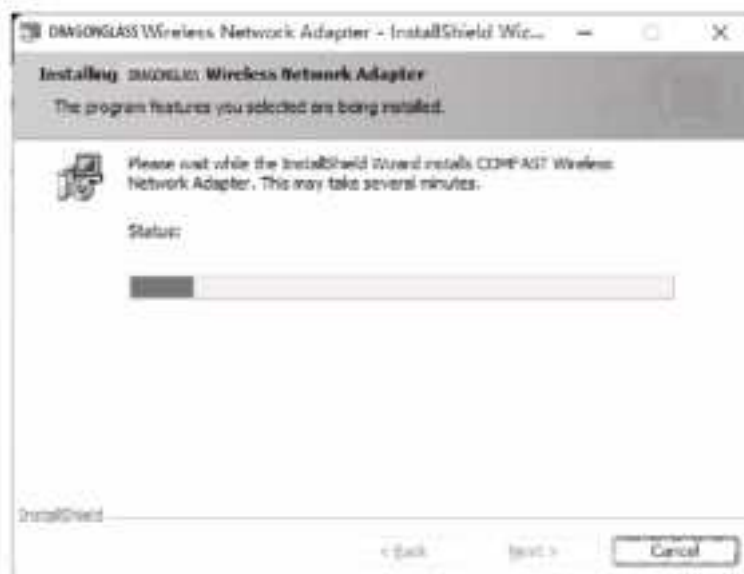

Note: When using a desktop computer, it is recommended to use a USB extension cord base to connect to the port on the back of the computer case (some desktop ports have insufficient power supply or cannot be used), and extend it to the Desktop computer usb ports.

2 Driver Installation

2-1 Open the driver folder and select the corresponding driver according to the system version, for example: double-click DRAGONGLASS setup x64.exe on a 64-bit system to open the installer; (If there is no CD-ROM driver, please go to the official website <http://www.sz-dragonglass.com> to download and install the driver)

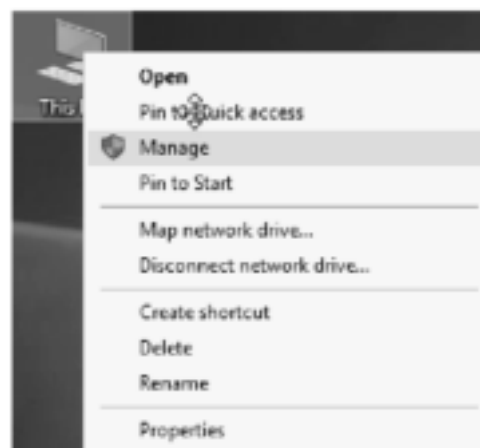

2-2 Then the driver will Automatically install.

2-3 After the installation is completed, it is recommended to restart the computer. If there is work in progress or files being written, you can restart it later. If there is nothing else, it is recommended to restart immediately;

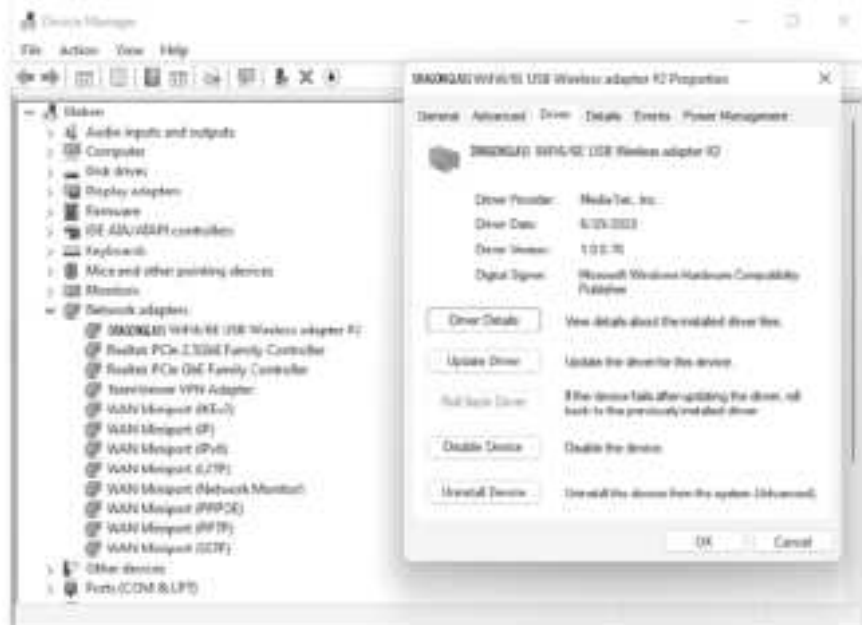

2-4 After restarting, the driver installation is complete, you can move the mouse to My Computer, right-click and select Manage to enter the management interface to view the driver status;

2-5 After entering the management page, click Device Manager, Network Adapter in turn, you can see the installed network card driver (Note: This step requires the network card to be connected to the computer to see it.)

2-6 Double-click to view the device details. If there is no abnormality, the driver is running normally as shown in the figure below and the driver details can be viewed;

3 Network connection settings

3-1. After confirming that the driver is installed correctly, you can double-click the wireless network card icon  in the lower right corner, and click the icon with the left mouse button. The computer will display the connectable wireless

3-2. Click the wireless network you want to connect to and enter the password to connect.

4 Network connection status

4-1. After the network is connected, the computer system icon will change to , and then you can right-click the icon and select "Open "Network and Internet" settings" to enter the setting selection interface.

4-2 Click the "Wi-Fi" option, and then click Show connected wireless, you can view the current IP, MAC address, gateway, driver version, etc. of the wireless.

Maintenance Regulations

Dear Valued Clients,

Thank you for purchasing **DRAGONGLASS** products. To protect your rights and interests in after-sales service, please read the following maintenance regulations.

The following do not belong to free maintenance, our company can provide paid service, please note:

- Failure to require the installation manual, use, maintenance, storage led to product failure or damage;
- Beyond the limited warranty, the warranty period; Unauthorized alteration, tearing up the product bar code;
- Without authorization to change the settings file or inherent disassemble;
- Unexpected factors or human actions lead to product damage, such as improper input voltage, temperature, watermechanical damage, break, rust or oxidation product of serious, etc;
- The damage caused by the transportation, loading and unloading caused by the customer's return for repair; the product failure or damage caused by force majeure such as earthquake, fire, lightning, etc.; Other non-product itself, design, technology, manufacturing, quality and other quality problems caused by the failure damage.

FCC Radiation Exposure Statement:

This device meets the government's requirements for exposure to radio waves. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons regardless of age or health. The SAR limit of USA (FCC) is 1.6 W/kg averaged. Device types: Wireless Network Card (FCC ID: 2A7HY-DGC3) has also been tested against this SAR limit. SAR information can be viewed on-line at <http://www.fcc.gov/betel/fccid/>. Please use the device FCC ID number for search. This device was tested simulation typical 10mm to body. To maintain compliance with FCC RF exposure requirements, the use of accessories should maintain a separation distance between the user's bodies mentioned above, the use of accessories should not contain metallic components in its assembly, the use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements, and should be avoided.

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
