

Class II Change Request Letter

Date: 30th May 2003

Bill,

For the pre-certified BlueTooth product with FCC ID: IXMUB22111S, we would like to ask for your kind attention on the fact that the output power of this product is only 0.5mW, which makes us believe that SAR evaluation is not needed even it is taken as portable device.

Due to the change on the rule of FCC, we would like to remove the grant note of 2.5cm separation warning via Class II Change filing from the certificate.

If you have any question regarding to this request, please let me know it. Thank you.

Regards,

Dr. Alan Lane
