

American Certification Body Inc.
6731 Whittier Ave, Suite C110, McLean, VA 22101, USA

The FCC ID does not appear on the module, due to the size of the module.
The host is always labelled with the FCC ID of the model, regardless of whether the module is visible or not; because the FCC ID is not on the module.

As part of this application, two other documents are uploaded to the labelling exhibits folder:

1. A document to explain the labelling of the module and to describe the size of the module.
2. A mock-diagram to show the module how it would look with a 4pt FCC ID on it.
The FCC ID does not fit on one line in this example and the the picture demonstrates that the FCC ID does not fit onto the label.
