Bluetooth connection speaker on the audio source device to complete Bluetooth pairir Then, the speaker can be used to play the audio content on the

NFC function • Enable the Bluetooth and NFC functions on the phone, and touch the icon ⊗ on the speaker with the NFC sensor area of the phone to automatically complete the Bluetooth connection between the phone and the speaker.

• When the phone and the speaker are connected, touch the icon⊗ on the speaker with the NFC sensor area of the phone to relay the audio from the phone to the speaker for playing.

EU Declaration of Conformity:

Stereo/group play

Double press \$ to enable the combination pairing status of each

Notes:

Two speakers of the same model can be paired for stereo play, and three or more speakers (up to eight speakers) of the same model can be automatically paired for group play.

When multiple speakers are used in combination, it is recommended to keep the speakers within 1 meter of each other.

The combination feature is mainly used for playing music. When playing videos, it will be affected by the device and network conditions, resulting in the audio and video being out of sync at varving degrees.

FCC Regulations:

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from
