

The image shows the back cover of a black mobile phone with its internal components exposed. A white label is centered on the back cover. To the left of the label is a small green circuit board with four gold pads. Below the label is a larger green circuit board with gold pads and a silver-colored metal shield. To the right of the label is a large green circular component with a silver-colored metal ring in the center. The back cover has several screws and a small metal pin at the bottom center.
