Connection Tutorial

1. Open the settings in your devices.
2. Open the bluetooth.
3. Click the "LINKLIKE HS1" to connect.
4. Enable the call and media permissions.

Two Device Connection Explanation

1. Turn on the headphones - Turn on the Bluetooth function on device A and device B - Connect them in the device interface;

2. Turn on the headphones - Turn on the Bluetooth function on device A - Connect them in the device interface - turn-off the device A's Bluetooth - Turn on the Bluetooth on device B - Connect them in the device interface - Then turn on both devices's Bluetooth again.
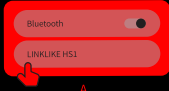

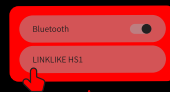

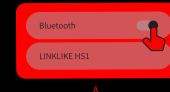

Check the Battery Level

- According to the system, you can check the battery level on the phone's negative one screen or the top bar.

Note: Different devices may have different Bluetooth settings. If they cannot reconnect immediately, you can manually click on the connection in the device's Bluetooth interface or turn the Bluetooth on and off again.

Volume Synchronization (Important)

- According to different systems, the sync function locations is different. You can find the sync function through the following steps:
1. IOS system: Automatic sync, no need to set up.
2. Android New system: Settings - Bluetooth - Headphone settings - Turn on volume sync function.
3. Android Old system: Settings - About phone - Tap on the version number repeatedly (at least 8 times) to enter developer mode - Do back to the settings interface, system and updates - Developer options - Turn on Bluetooth absolute volume - Done (you can exit developer mode in the status bar).

Tip: To better control the volume and enjoy music, it is better to turn on the sync function as soon as you get the phone.
